Ms R Udhaya
No 2/3, Radha Nagar
1st Street, West Velachery
Chennai 600042 [Tamil Nadu]

Dear Ms Udhaya,

This is in reference to your application **CHES2593** for an IASc-INSA-NASI Summer Research Fellowship in 2019. We are happy to **offer you a Fellowship to work** for two months during this summer subject to verification of your marks as stated by you in the application with the marks sheets. You will be working with Dr K. Geetharani, Indian Institute of Science, Bengaluru (e-mail: geetharani@iisc.ac.in).

We have tried as far as practicable to assign you to a guide who works in your area of interest. Where that has not been possible, you will work with the assigned guide in a related area that will be determined by the guide, and trust that the experience will be fruitful to you. We will not be able to make any change in this regard.

This Fellowship is subject to the following norms:

- The duration of the Fellowship is eight weeks (56 days – including Sundays and General Holidays), and is not to be reduced. If you do not complete this requirement, you will not be paid the fellowship amount and the certificate that is usually issued on completion.
- You will be provided a second class [sleeper class] train fare from Chennai to IISc, Bengaluru and back.
- If you are NOT an INSPIRE/KVPY Fellowship holder, you will be paid a Fellowship of Rs. 12,500/- per month towards your boarding, lodging, local transport expenses*. Those who are in receipt of INSPIRE/KVPY Fellowship will be covered by a separate arrangement, the details of which will be sent later.
- The Academy will arrange accommodation at its Fellows Residency in Bengaluru for about 100 summer fellows on first come first serve basis.

Please also go through carefully & comply with **all the Instructions** given in the attached sheet.

You are advised to get in touch with Dr Geetharani immediately to work out the exact period of your visit. In the meantime please communicate with Mr C.S. Ravi Kumar, Coordinator, Science Education Programme, your acceptance of this Fellowship. We would need a joining report from you upon your arrival, and a brief report of your work at the end of four weeks so that your Fellowship for the first month can be paid. After the receipt of the final report, we shall release the remaining amount due to you along with your travel fare.

We urge you to convey your acceptance of this fellowship within 7 days by both online (the URL and password given at the bottom of the email) as well as by **returning the Form of Acceptance** posted to you. Even if you are not able to accept the fellowship, this should be communicated to the Academy immediately (both by email and in the Form of Acceptance email: joinscf@iisc.ac.in) so that the fellowship can be offered to another candidate in the waiting list.

With best wishes,

Yours sincerely,

Professor M.R.N. Murthy
Chairman, Joint Science Education Panel, IASc

* It is recommended that each Summer Research Fellow (SRF) be covered by a personal health/accident insurance policy during the period of summer-morning. The Academies will not provide any insurance cover. Therefore, the responsibility for purchasing aforementioned cover with the SRF.

MANUSCRIPT DETAILS

TITLE: Potential dressing based on nanoparticles of metallic gold, silver, copper and silver-palladium alloy stabilized on chitosan.

ABSTRACT:

The chemical liquid deposition (CLD) along with solvated metal atom dispersed (SMAD) method was used. Chitosan (QS) in 2-propanol, from which metallic nanoparticles (MNPs) ranging 10-50 nm of Cu, Au, Ag and Ag-Pd were obtained. The QS films with nanoparticles (NPs) characterization was carried out by techniques such as: X-ray dispersive spectroscopy (SEM / EDX), atomic force microscopy (AFM), high resolution transmission electron microscopy (HRTEM),

Fourier Transform Infrared Spectroscopy (FT-IR) and Thermogravimetric Analysis (TGA).

Assays were carried out to determine the antibacterial activity of chitosan/nanoparticles films, using four bacterial strains (*Staphylococcus aureus* ATCC (25923), *Staphylococcus epidermidis* ATCC (12228), *Escherichia coli* ATCC (85922) and *Pseudomonas aeruginosa* ATCC (27853), QS-Ag and Ag-Pd showed the best inhibitory action. Results obtained through bioassays in rats, showed a better reconstitution of the epithelium, less necrotic tissue and increase in vascularization, this study will aid to develop new materials with potential use in the formulation of dressings.

Comments to author for previous version:

Reviewer 1: (Previous Version)

This is very promising research - and I am excited to see more papers on this topic.

A few suggestions that can still improve the quality of this manuscript:

- use more recent references. In the introduction references from 2000 - 2004 were used. These are important but other more recent references can be included - if these do not exist, please comment
- When comparing your results to results from the literature in the result section, please use a sentence or two to give the reader a quick overview of the other researchers results and do not just list a reference
- make sure to use the same style (References, captions, etc.) throughout the manuscript
- double check for grammar and language

Looking forward to see this published soon
