Global Diplomacy – Diplomacy in the Modern World <no-reply@t.mail.coursera.org> Sat, 31 Jul, 2021 at 9:35 am
To: PRATAP 3370 <stevewozniak604@gmail.com>

Dear PRATAP 3370,

Thank you for signing up for *Global Diplomacy: Diplomacy in the Modern World!* We are delighted to have you on this course.

You will develop a critical understanding of the nature and development of global diplomacy, drawing on a variety of relevant contributing disciplines in the broad field of International Studies. Understanding the changes in diplomatic practices and procedures and the relationship of those changes to contemporary politics. A sound grounding in both theoretical and empirical approaches to debates in diplomacy so that you have been exposed to the skills needed to analyse global diplomacy. Knowledge of issues in global diplomacy in historical and contemporary contexts.

Now let's get started! We hope you enjoy the course.

Subject: *Selection in the 'Internship cum training on molecular biology, cell biology and spectroscopic techniques' (4th -25th October 2021)*

Greetings from Sathyabama Institute of Science and Technology, Chennai.

Kindly refer to your internship letter for the 21 days internship programme on '**Molecular biology, cell biology and spectroscopic techniques**' during 4th to 25th October, 2021 being organized at Centre for Ocean Research, Sathyabama Institute of Science and Technology, Chennai. I am glad to inform you that 15 students are accepted and requested to attend the internship programme.
Please also note the following SIST guidelines: 15 students are requested to come by SIST-Bus only (not to accept public transport). All the students must submit a hard copy of COVID-19 vaccine certificate.

Looking forward to welcoming all the students and wish them a productive time at Centre for Ocean Research, SIST.

TRAINEESHIP OFFER LETTER

3rd Jun 2021

Dear BARGAVI NAGARAJAN,

With reference to your application and subsequent discussions, we have pleasure in offering you traineeship in our organization as Ambassador

During this training probation period you are required to undertake all duties and activities as assigned to Moushmi B to whom you will be reporting

You'll be representing our organization and functioning based on our requirements. You'll be provided with number of opportunities to exhibit your leadership and managerial skills. At the end of the term, based on your performance you'll receive a certificate describing your achievements and active participation.

During the period of traineeship, you may have access to trade secrets and confidential business information belonging to the Company. By accepting this offer, you acknowledge that you must keep all of this information strictly confidential, and refrain from using it for your own purposes or from disclosing it to anyone outside the Company.

In addition, you agree that, upon conclusion of your internship, you will immediately return to the Company all of its property, equipment, and documents, including electronically stored information. Your appointment will be governed by the terms and conditions presented in the **Agreement**.

Best Regards,

Corporate-HR,

TRAINEESHIP OFFER LETTER

4th Jun 2021

Dear Dhanalakshmi R K,

With reference to your application and subsequent discussions, we have pleasure in offering you traineeship in our organization as Marketing Intern

During this training probation period you are required to undertake all duties and activities as assigned to **SAROJA.SV** to whom you will be reporting

You'll be representing our organization and functioning based on our requirements. You'll be provided with number of opportunities to exhibit your leadership and managerial skills. At the end of the term, based on your performance you'll receive a certificate describing your achievements and active participation.

During the period of traineeship, you may have access to trade secrets and confidential business information belonging to the Company. By accepting this offer, you acknowledge that you must keep all of this information strictly confidential, and refrain from using it for your own purposes or from disclosing it to anyone outside the Company.

In addition, you agree that, upon conclusion of your internship, you will immediately return to the Company all of its property, equipment, and documents, including electronically stored information. Your appointment will be governed by the terms and conditions presented in the **Agreement**.

Best Regards,

Corporate-HR,

TRAINEESHIP OFFER LETTER

18th May 2021

Dear Vedakshi k,

With reference to your application and subsequent discussions, we have pleasure in offering you traineeship in our organization as Marketing Intern

During this training probation period you are required to undertake all duties and activities as assigned to **SWATHI C** to whom you will be reporting

You'll be representing our organization and functioning based on our requirements. You'll be provided with number of opportunities to exhibit your leadership and managerial skills. At the end of the term, based on your performance you'll receive a certificate describing your achievements and active participation.

During the period of traineeship, you may have access to trade secrets and confidential business information belonging to the Company. By accepting this offer, you acknowledge that you must keep all of this information strictly confidential, and refrain from using it for your own purposes or from disclosing it to anyone outside the Company.

In addition, you agree that, upon conclusion of your internship, you will immediately return to the Company all of its property, equipment, and documents, including electronically stored information. Your appointment will be governed by the terms and conditions presented in the **Agreement**.

Best Regards,

Corporate-HR,

Hi All,
Greetings of the day.

We congratulate all of you for taking part in our Pan India Intern Hiring Program Conducted on 27th May 2021 and getting selected for the 4 month Internship Program.

Please note that, you have to get concurrence from your HOD/ Placement Coordinator/ Placement Officer by email , so that you can carry out the internship program with us.
(One email per College is sufficient , if multiple candidates are there from Single College).

We welcome you to be part of the RiSiNh Family . All the best to all of you to utilize this opportunity as a platform for learning, and obtain immense amount of Handson/Practical Knowledge of the Technology/Industry.

Rise up the Ladder , Sustain with Your Skills and Nurture new talents.

Thanks and Best Regards,
Mohana,

Dear P. Sathish,

Sh Creative is happy to get you on board as a Marketing and Promotions Intern .

We created Internship program with an aim to help students who were looking to get mentored in their field of interest/passion, and we expect you to proceed with your internship keeping the same idea in your mind.

Your internship begins on 1st June 2021 and the first month will end on 30th June 2021.

Throughout your internship period you would be led by your Operations Executive who will provide you Learning and Development sessions while also helping you solve the problems that you would face while achieving your targets. Your initial targets will also be communicated to you by them.

We hope you have a great learning experience with us and grow in the process of this internship.

Thank You,

Regard

Respected Sir / Madam,

Greetings from the Department of Social Work-Guru Nanak College, Chennai.

Guru Nanak College (Autonomous) is one of the premier institutions of education in Tamil Nadu, India and was re-accredited at "A" Grade by NAAC and is affiliated to the University of Madras. The Post - Graduate department of Social Work was started in 2018 and offers Medical and Psychiatric Social Work, Community Development and Human Resource Management as specialisations during their final year of the MSW degree.

Summer internship is carried out at the end of the first year of the programme and the student will be placed in an agency/organization. This programme is designed for the social work trainees to integrate theory and practice to enhance competencies in the area of their specialization. The social work trainees are expected to report to the agency supervisor and adhere to the rules/regulations and timings of the agency.

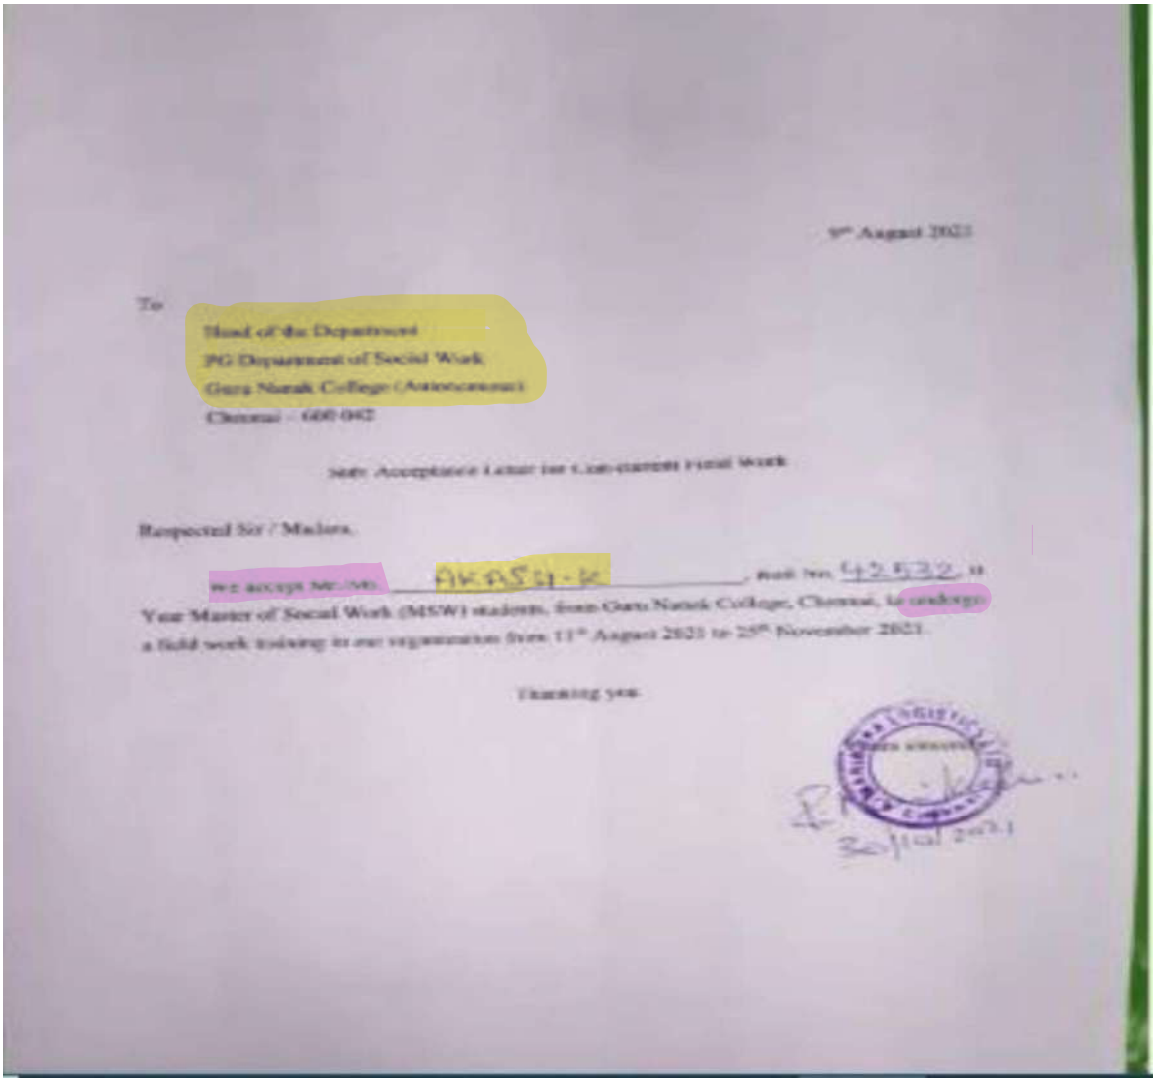

In this regard, we request you to kindly offer an opportunity to Ms. Jayasri T. Roll No. 5151037 to do his internship training in your esteemed organization voluntarily/free for 21 days. We kindly request you to provide completion certificate to the trainee after successful completion of summer internship training.

Thanking You,

Respected Sir / Madam,

Greetings from the Department of Social Work-Guru Nanak College, Chennai.

Guru Nanak College (Autonomous) is one of the premier institutions of education in Tamil Nadu, India and was re-accredited at "A" Grade by NAAC and is affiliated to the University of Madras. The Post - Graduate department of Social Work was started in 2016 and offers Medical and Psychiatric Social Work, Community Development and Human Resource Management as specializations during their final year of the MSW degree.

Block Internship is carried out at the end of the final year of the programme and the student will be placed in an agency/organisation. This programme is designed for the social work trainees to integrate theory and practice to enhance competencies in the area of their specialisation. The social work trainees are expected to report to the agency supervisor and adhere to the rules/regulations and timings of the agency.

In this regard, we request you to kindly offer an opportunity to KUNAL G Roll No. 19SW04 to do his internship training in your esteemed organisation virtually/offline for 21 days. We kindly request you to provide completion certificate/letter to the trainee at the successful completion of Block internship training.

Thanking You.

Dear Noyal

Welcome to our internship program - partial in person & online internship.
Mr Satish Kumar, Training Manager, YRGCARE will be your direct mentor/supervisor.

We shall meet you at our office at T.Nagar on 19th July (Monday) at 10 am.
Kindly bring your laptop and ensure you have a good internet service.

We require you to complete a few formalities....
(A) Link to the Registration form: YRG Foundation Internship Program (kindly complete prior to joining)

(B) Link to Sample Daily Report: https://ouo.io/7jAD3NK (needs to start on the first day of internship)
Since its online, our timings are flexible, so we request you to kindly use the daily reporting system to keep us updated and to complete your daily 7-8 hours of internship requirement.

(C) Communication with:
Mentor: Daily communication will continue 1-2 per day to begin with at the beginning and end of each day to plan and report in with your mentor.
Myself: Do call me weekly for an update call.

There are 2 projects you will be working on with our team. Do review these online on our website.

1)Camp Rainbow - facilitation and activities for campers
And working on a separate project assignment related to Camp Rainbow

2) YRG121 - helpline counseling service on HIV and COVID - Psychosocial and mental health support.
You will receive on the job training and you will be given assignments to help you with building counseling skills, recording and documentation.

With warm regards,
Rochelle

SHINE PROJECT
HYDERABAD

Respected Sir / Madam,

Greetings from the Department of Social Work-Guru Nanak College, Chennai.

Guru Nanak College (Autonomous) is one of the premier institutions of education in Tamil Nadu, India and was re-accredited at "A" Grade by NAAC and is affiliated to the University of Madras. The Post - Graduate department of Social Work was started in 2016 and offers Medical and Psychiatric Social Work, Community Development and Human Resource Management as specializations during their final year of the MSW degree.

Summer internship is carried out at the end of the first year of the programme and the student will be placed in an agency/organization. This programme is designed for the social work trainees to integrate theory and practice to enhance competencies in the area of their specialisation. The social work trainees are expected to report to the agency supervisor and adhere to the rules/regulations and timings of the agency.

In this regard, we request you to kindly offer an opportunity to M. SREE ARVIND, Roll No. 142529 to do his internship training in your esteemed organisation virtually/offline for 21 days. We kindly request you to provide completion certificate/letter to the trainee at the successful completion of summer internship training.

Thanking You,

Dear *M. Sree Arvind*

Greetings from www.shineprojects.in

You have been selected as a Human Resource Intern for duration of 4 weeks from

08/06/2021 - 08/07/2021

Job Roles and Responsibilities:

1. Execute the necessity of satiating the inadequacies of Human Resources. All their concerns should be listened to and efforts should be made to address them.
2. Undertake promotional activities such as endorsement in order to publicize and make known the recruitment campaigns which take place online.
3. Recruitment of business development agents from various platforms in order to facilitate the development of the business.
4. Communicating about the induction and orientation process of new personnel.
5. Provide motivation and guidance to interns and set an example of a leader.
6. Maintain the provision of doubt clearance in case of the arising of queries.
7. Evaluate the performance of agents without bias.

Rewards:

1. You will be entitled for a fixed stipend payment of **Rs. 5,000** once all the agents under you will collectively perform 20 enrolments.
2. You will also be entitled for a variable pay of **Rs. 150** per each and every enrolment performed by agents under you.
3. You will be offered permanent Work from home part-time employment with a starting salary of **Rs. 5,000** per month when over-all enrolments shall touch "100" during your internship tenure.
4. Certificate of completion & LOR would be provided once agent under you finishes "1" enrolment *(any one agent during 1 enrolment will suffice)*

Dear **Aravindhan**,

We are pleased to inform you that you have been appointed as **"Recruiter"** in the **TMTG** at **Chennai** on a non-exclusive basis, from **08-Apr-2021 till 07-Oct-2021** for a period of six months and you will be providing the following agency services.

Sourcing and onboarding of suitable candidates who would work for our client after training and on completion of necessary assessment tests at our client location and allied matters.

Be it clearly understood and agreed that by this arrangement, no relationship of employer and employee will emerge in any circumstances and you will not be entitled to any other statutory or welfare benefits which are available to the employees, except the fixed and variable agency commission as per terms and conditions given in the annexure attached.

The agency commission payable to you shall be subject to deduction of income tax at source.

You shall start carrying out your assigned obligations immediately on acceptance of this letter. You would be providing agency services and allied activities in your assigned area/market /field directly. You would not be provided with any company equipment like laptop, phone, etc. You may be required to visit our office occasionally on matters pertaining to this agreement. You would not be paid any conveyance for your visits to office. You shall strictly abide by the terms of engagement and in case of any violations in carrying out your obligations, the company reserves the right to terminate your agency without notice and also initiate appropriate legal proceedings (civil or criminal) against you as the company may deem fit.

This agency engagement can be terminated by either side by giving one week's notice.

You are requested to provide your PAN and AADHAR cards as proof of identity and your residential address. In case of change in your address, you shall intimate the company by writing a formal e-mail to us at hr@teamlease.com along with your emp id (or any other new mail ID for resolving their queries, etc.)

Your monthly claims shall be processed and settled before the Last Working Day of the month. Please refer the annexure 1 for payout details.

In case the above terms are acceptable to you, please convey your acceptance by signing the duplicate copy of this letter. This agreement shall be valid for a maximum period of one week for your

To

MEDICAL SOCIAL WORKER
TEAM MENTAL HEALTH, FORTIS HEALTH CARE
CHENNAI.

Respected Sir / Madam,

Greetings from the Department of Social Work, Guru Nanak College, Chennai.

Guru Nanak College (Autonomous) is one of the premier institutions of education in Tamil Nadu, India and was re-accredited at "A" Grade by NAAC and is affiliated to the University of Madras. The Post - Graduate department of Social Work was started in 2016 and offers Medical and Psychiatric Social Work, Community Development and Human Resource Management as specializations during their final year of the MSW degree.

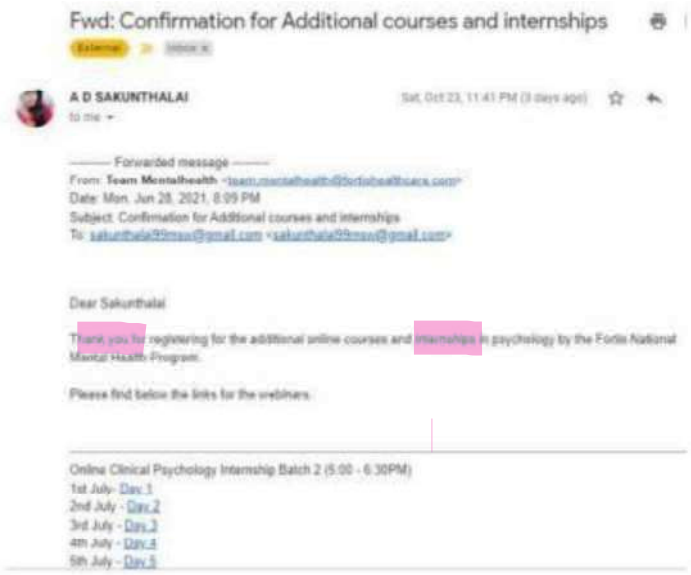

Block Internship is carried out at the end of the final year of the programme and the student will be placed in an agency/organisation. This programme is designed for the social work trainees to integrate theory and practice to enhance competencies in the area of their specialisation. The social work trainees are expected to report to the agency supervisor and adhere to the rules/regulations and timings of the agency.

In this regard, we request you to kindly offer an opportunity to A. D. SAKUNTHALA Roll No. 32407 to do his internship training in your esteemed organisation virtually/offline for 21 days. We kindly request you to provide completion certificate/letter to the trainee at the successful completion of Block internship training.

Thanking You,

PRINCIPAL

WE DELIVER SOLUTION THROUGH INNOVATION

No.13, 1st Cross, Maraimalai Nagar, Velrampet, Puducherry -605004

To,

The Head of Department
Advanced Zoology and Biotechnology,
Guru Nanak College,
Chennai -42

Respected Sir/Madam,

Sub: Permitting the student for an internship –reg.

This letter is to confirm you that the following students from the Department of Advanced Zoology and Biotechnology have been offered an internship with our firm as Trainee in Frontend Development Team.

1.	S MUTHURAMAN	Roll no: 5843
2.	S KISHORE	Roll no: 5845
3.	V TAMILSELVAM	Roll no: 5841
4.	M GNANASEKAR	Roll no: 5848
5.	E LOGESHWARAN	Roll no: 5807

As the above students will be receiving academic credit for this position, they will not be paid. Additionally, students do not receive benefits as part of their internship program. During this internship the interns will be given online training in HTML elements and forms.

The internship program will start on 01.10.2021 and end on 24.10.2021 or until the student completes the required number of internship course.

Saadiq, Muhammad ao-2021-05362r - Sheik Eusuff - Invitation to Review Manuscript 28-Sep-2021

ACS Omega <onbehalfof@manuscriptcentral.com> Wed, Sep 29, 2021 at 2:39 AM
Reply-To: Ganesh-office@omega.acs.org
To: senoorjahan@gmail.com

28-Sep-2021

Journal: ACS Omega
Manuscript ID : ao-2021-05362r
Title: "Synthesis, bioactivity assessment and molecular docking of non-sulfonamide benzimidazole-derived N-acylhydrazone (NAH) scaffolds as carbonic anhydrase II inhibitors"
Author(s): Saadiq, Muhammad; Latif, Abdul ; Ali, Mumtaz; Akbar, Nazia; Ammara, *; Ali, Sardar; Ahmad, Manzoor; Zahoor, Muhammad; Khan, Dr. Ajmal ; Al-Harrasi, Ahmed; Uddin, Ghias

COVID-19 Support: Please visit the following website to access important information for ACS authors and reviewers during the COVID-19 crisis: https://axial.acs.org/2020/03/25/chemists-covid-19-coronavirus/

We are flexible in these unprecedented times affecting the global research community. If you need more time to complete authoring or reviewing tasks, please contact the editorial office and request an extension.

Dear Dr. Sheik Eusuff:

I am writing to invite you to review the following manuscript for ACS Omega, http://pubs.acs.org/journal/acsodf. The abstract can be found below.

ACS Omega is a global, open access publication for high quality original articles of any length that describe new findings in chemistry and interfacing areas of science, without any restrictive or subjective assessment of importance. Research articles in emerging multidisciplinary fields are especially encouraged. You can read more about the Editorial vision for ACS Omega at http://pubs.acs.org/doi/full/10.1021/acsomega.6b00103.

We would like to receive reviews within two weeks. If you are able to accept this invitation, you may use the link below to register your response with us. If you are unable to accept, I would appreciate any suggestions you may have as to who would be an appropriate reviewer.

You're receiving this because you have been identified as a subject matter expert in the field. Rest assured, ACS takes your privacy seriously. Please see our privacy statement: https://www.acs.org/content/acs/en/privacy.html#pubs

For your convenience, the hyperlinks below can be used to accept or decline this invitation automatically:

Invitation to Review Manuscript am-2021-17762f

ACS Applied Materials & Interfaces <onbehalfof@manuscriptcentral.com> Fri, Sep 24, 2021 at 8:04 AM
Reply-To: yu-office@ami.acs.org
To: senoorjahan@gmail.com

23-Sep-2021

Journal: ACS Applied Materials & Interfaces
Manuscript ID : am-2021-17762f
Title : "Nanostructured Shell-Layer Artificial Antibody with Fluorescence-Tagged Recognition Sites to the Trace Detection of Heavy Metal Ions by Self-Reporting Microsensor Arrays"
Author(s): Xia, Xiaoxiao; Du, Xianfeng; Yang, En; Cai, Yue; Chang, Fei; Gao, Daming

Dear Dr. Sheik Eusuff:

ACS Applied Materials & Interfaces seeks to publish high quality manuscripts that integrate knowledge in the areas of materials science, engineering, bio-related sciences, and chemistry into important applications. The quality of the manuscripts published in ACS Applied Materials & Interfaces is expected to be comparable to that of papers published in peer ACS journals.

The above-referenced manuscript has been submitted for consideration as an ARTICLE in ACS Applied Materials & Interfaces. We would greatly appreciate if you would agree to review this manuscript for the journal, and in order to help you decide, the abstract is available at the end of this message.

If you agree to review this manuscript, I would appreciate receiving your review within three weeks.

You're receiving this because you have been identified as a subject matter expert in the field. Rest assured, ACS takes your privacy seriously. Please see our privacy statement: https://www.acs.org/content/acs/en/privacy.html#pubs

The hyperlinks below can be used to accept or decline this invitation automatically:

COVID-19 Support: Please visit the following website to access important information for ACS authors and reviewers during the COVID-19 crisis: https://axial.acs.org/2020/03/25/chemists-covid-19-coronavirus/

We are flexible in these unprecedented times affecting the global research community. If you need more time to complete authoring or reviewing tasks, please contact the editorial office and request an extension.

If you are unable to review this manuscript, you will be provided with the opportunity to suggest alternative reviewers. This information is optional but if you can provide alternative reviewers with their email address, that would be most helpful.

For the convenience of our authors, ACS offers a manuscript transfer service. If this manuscript is not suitable for this journal, I may suggest the author consider a transfer to another ACS journal. If the author accepts the offer of transfer, your review of the manuscript will also be transferred. Please be assured that your review will be handled with the same confidentiality in the next ACS journal as in this journal.

Sincerely,

Dr. Kui Yu

EST: Reviewer Invitation for Performance Evaluation of Air Pollution Control device at Traffic Intersections in Delhi City

Inbox

Gobinath Ravindran <em@editorialmanager.com> Mon, Apr 5, 2:01 PM

to me

CC: gobinathdpi@gmail.com, r.gobinath2013@vit.ac.in

Dear Dr E,

As the Editor of the journal International Journal of Environmental Science and Technology I want to ask you if you could review the article "Performance Evaluation of Air Pollution Control device at Traffic Intersections in Delhi City" for a possible publication in our journal.

This is the abstract:
Urban air pollution and exposure related health impacts are being noticed and discussed very intensely in India. On the other hand, source-specific control is the primary focus for policymakers; however, diverse and complex sources make it difficult to immediately see the action and consequent impacts on better air quality. Many cities across the world have witnessed high air pollution levels at traffic junctions, more so in all Indian cities. Site-specific air pollution reduction can be a promising solution for managing the pollution level at highly polluted locations. CSIR-National Environmental Engineering Research Institute, India has designed and developed wind augmentation and purifying unit (WAYU) to remove particulate and gaseous pollutants from urban hotspots such as traffic locations. In the present study, the authors attempted to evaluate the performance of two different designs of WAYU for the removal of particulate matters from polluted air at different traffic
locations in Delhi City, National capital territory of India. The performance analyses show that the current design of WAYU removes PM 10 and PM 2.5 concentration in the range of 34-49% and 19-25%, respectively. The PM removal rate by a device varies as its impacted due to variation in pollution load of PM in the ambient air and also variation in particle sizes. Particle size analyses also indicate that the design of filters and its combination plays an important role. The total PM collected from all WAYU units was 34.19kg from 120557 operating hours' at all the sampling sites.

JEST: Reviewer Invitation for The Effects of Fertilizers on Increasing the Radioactivity of Cabbage Plants

Inbox

Gobinath Ravindran <em@editorialmanager.com> Wed, Nov 18, 2020, 11:14 AM

to me

CC: gobinathdpi@gmail.com, r.gobinath2013@vit.ac.in

Dear Dr E,

As the Editor of the journal International Journal of Environmental Science and Technology I want to ask you if you could review the article "The Effects of Fertilizers on Increasing the Radioactivity of Cabbage Plants" for a possible publication in our journal.

This is the abstract:
In the present work, the effects of different types of fertilizer on the natural radioactivity content of soil and cabbages was studied. Gamma spectroscopy Reagent NaI (Tl) was used to estimate the radioactivity concentration in cabbage and soil samples before (one reference sample was grown without adding any fertilizers) and after the fertilization process (five samples were fertilized over the entire planting period). Five common types of fertilizer used on Iraqi farms were separately added to each cabbage plant (NPK, DAP, urea, and organic). The specific activity of U-238 ranges from 0.52±0.83Bq kg -1 for D.2 (urea from Iraq) to 4.15±0.51 Bq kg -1 for D.1 (DPA, super phosphate P 2 O 5 from Lebanon). In all the used types of fertilizers, the Th-232 specific activity was less than 1 Bq kg -1 . Very low U-238 and Th-232 activity was observed in the soil and cabbage samples produced without fertilizer (below 0.2 Bq kg -1). The highest specific activity for K-40 in the fertilizer samples (188.16±19.6 Bq kg -1) was found in the Emirati fertilizer sample (NPK, N.4). Based on the specific activity measurements, the radiation hazard parameters were estimated. The radiation hazard parameters fall within the recommended limits. It is recommended that the super phosphate P2O5 (DAP) composite not be used: if its use is necessary, then radiological controls must be employed. The values of the mean hazard parameters for all samples are lower than the worldwide average values and those from previous studies.

JEST: Reviewer Invitation for Production of plant growth promoting metabolites and mitigation of chromium and arsenic stress on growth of maize

Inbox

Parveen Fatemeh Rupani <em@editorialmanager.com> Sat, Mar 27, 4:21 PM

to me

CC: parveenrupani@gmail.com

Dear Dr E,

As the Editor of the journal International Journal of Environmental Science and Technology I want to ask you if you could review the article "Production of plant growth promoting metabolites and mitigation of chromium and arsenic stress on growth of maize" for a possible publication in our journal.

This is the abstract:
153 actinobacterial isolates were obtained from El-Rahawy drain, El-Rahawy village soil and plants irrigated by El-Rahway wastewater that exposure to various sources of contamination. Interestingly, 96.73% of Actinomycetes isolates were able to produce 50% or more of plant growth regulators substances under study. On the other hand, only 13.73% of them were able to produce all of these bioactive metabolites. The endophytic NRC21696 strain of Morus alba L. was the hyper active PGPEA then it was identified based on its phenotypic, chemotypic and genotypic characteristics as Streptomyces sp. NRC21696. It showed potent heavy metal-resistant against a wide spectrum of metals along with effective ability to remove these heavy metals in particular Cr 6+ and As 3+ from real wastewater. The selected strain, Streptomyces sp. NRC21696, proved to be an efficient inoculant for healthier maize in natural as well as As 3+ and Cr 6+ metal stressed conditions at different
concentrations (800, 1200, 1600, 2000, 2500 and 3000 ppm). There were significant increases in the germination percentage, rate and index; tolerant indexes, fresh weights, dry weights and lengths of leaf, root and cob along with photosynthetic pigments compared to non-inoculated Zea mays in normal and stressed conditions, respectively. The positive effects of NRC21696 inoculation have been attributed to its efficiency in the excretion of various plant growth promoting factors as well as mitigation of the adverse effects of As 3+ and Cr 6+ stress on maize in normal, salty or heavy metals contaminated soils whether under normal or wastewater irrigation practices.

JEST: Reviewer Invitation for "Spatial–temporal assessment and modeling of ecological security based on land use/cover changes (Lavasanat watershed, Iran)"

Inbox

Samareh Mirkia <em@editorialmanager.com> Apr 27, 2021, 10:28 AM

to me

CC: samareh.mirkia@gmail.com

Dear Dr E,

Some weeks ago you reviewed the above mentioned manuscript. The authors have changed it according to your proposals. Please check it again concerning the publication in International Journal of Environmental Science and Technology.

This is the abstract:
Spatial–temporal land-use changes can greatly influence ecosystem services and landscape patterns, which themselves are important factors of ecological security. Spatial–temporal land-use changes can greatly influence ecosystem services and landscape patterns, which themselves are important factors of ecological security. This study analyzed the spatial–temporal changes of land-use/cover in the Lavasanat watershed (Tehran, Iran) between 2000 and 2020 using Landsat satellite images and evaluated the ecological security of the region in terms of landscape metrics and ecosystem services. The spatial–temporal analysis of land-use changes in the 20-year period between 2000 and 2020 showed the substantial growth of the region's residential areas because of population growth and rising demand for housing and the consequent urban expansion. This analysis also showed a decreasing trend in the total area of agricultural lands in the region.The results suggest that uncontrolled real
estate development has greatly affected the ecological structure of the Lavasanat region by breaking the continuity of agricultural lands and replacing the large patches of these lands, which are of great ecological value, with smaller patches, which have far lower ecological value. Also, the results of the InVEST scenario-generator model and the water yield model showed an increase in the water yield of the Lavasanat watershed because of the expansion of built (residential) land-uses, which has led to increased runoff. These changes will have significant environmental consequences such as increased soil erosion, reduced regional groundwater recharge, and easier contaminant displacement, which will undermine the ecological security of the region.

Please find both the reviewer comments to authors of the previous version and the author's response at the bottom of the letter.

CC: samareh.mirkia@gmail.com

Dear Dr E,

Some weeks ago you reviewed the above mentioned manuscript. The authors have changed it according to your proposals. Please check it again concerning the publication in International Journal of Environmental Science and Technology.

This is the abstract:
Spatial–temporal land-use changes can greatly influence ecosystem services and landscape patterns, which themselves are important factors of ecological security. Spatial–temporal land-use changes can greatly influence ecosystem services and landscape patterns, which themselves are important factors of ecological security. This study analyzed the spatial–temporal changes of land-use/cover in the Lavasanat watershed (Tehran, Iran) between 2000 and 2020 using Landsat satellite images and evaluated the ecological security of the region in terms of landscape metrics and ecosystem services. The spatial–temporal analysis of land-use changes in the 20-year period between 2000 and 2020 showed the substantial growth of the region's residential areas because of population growth and rising demand for housing and the consequent urban expansion. This analysis also showed a decreasing trend in the total area of agricultural lands in the region.The results suggest that uncontrolled real
estate development has greatly affected the ecological structure of the Lavasanat region by breaking the continuity of agricultural lands and replacing the large patches of these lands, which are of great ecological value, with smaller patches, which have far lower ecological value. Also, the results of the InVEST scenario-generator model and the water yield model showed an increase in the water yield of the Lavasanat watershed because of the expansion of built (residential) land-uses, which has led to increased runoff. These changes will have significant environmental consequences such as increased soil erosion, reduced regional groundwater recharge, and easier contaminant displacement, which will undermine the ecological security of the region.

Please find both the reviewer comments to authors of the previous version and the

author's response at the bottom of the letter.

EST: Reviewer Invitation for Performance Evaluation of Air Pollution Control device at Traffic Intersections in Delhi City

Inbox

Gobinath Ravindran <em@editorialmanager.com> Mon, Apr 5, 2:01 PM

to me

CC: gobinathdpi@gmail.com, r.gobinath2013@vit.ac.in

Dear Dr E,

As the Editor of the journal International Journal of Environmental Science and Technology I want to ask you if you could review the article "Performance Evaluation of Air Pollution Control device at Traffic Intersections in Delhi City" for a possible publication in our journal.

This is the abstract:
Urban air pollution and exposure related health impacts are being noticed and discussed very intensely in India. On the other hand, source-specific control is the primary focus for policymakers; however, diverse and complex sources make it difficult to immediately see the action and consequent impacts on better air quality. Many cities across the world have witnessed high air pollution levels at traffic junctions, more so in all Indian cities. Site-specific air pollution reduction can be a promising solution for managing the pollution level at highly polluted locations. CSIR-

National Environmental Engineering Research Institute, India has designed and developed wind augmentation and purifying unit (WAYU) to remove particulate and gaseous pollutants from urban hotspots such as traffic locations. In the present study, the authors attempted to evaluate the performance of two different designs of WAYU for the removal of particulate matters from polluted air at different traffic
locations in Delhi City, National capital territory of India. The performance analyses show that the current design of WAYU removes PM 10 and PM 2.5 concentration in the range of 34-49% and 19-25%, respectively. The PM removal rate by a device varies as its impacted due to variation in pollution load of PM in the ambient air and also variation in particle sizes. Particle size analyses also indicate that the design of filters and its combination plays an important role. The total PM collected from all WAYU units was 34.19kg from 120557 operating hours' at all the sampling sites.

to me

CC: gobinathdpi@gmail.com, r.gobinath2013@vit.ac.in

Dear Dr E,

As the Editor of the journal International Journal of Environmental Science and Technology I want to ask you if you could review the article "Spatial–temporal assessment and modeling of ecological security based on land use/cover changes (Lavasanat watershed, Iran)" for a possible publication in our journal.

This is the abstract:
This study analyzed the spatial–temporal changes of land-use/cover in the Lavasanat watershed (Tehran, Iran) between 2000 and 2020 using Landsat satellite images and evaluated the ecological security of the region in terms of landscape metrics and ecosystem services. The spatial–temporal analysis of land-use changes in the 20-year period between 2000 and 2020 showed the substantial growth of the region's residential areas because of population growth and rising demand for housing and the consequent urban expansion. This analysis also showed a decreasing trend in the total area of agricultural lands in the region. At the class level, landscape patterns were quantified using six metrics: (NP), (LSI), (IJI), (CA), (PLAND), and (LPI). At the landscape level, this quantification was done by the use of NP, LSI, and IJI as well as (ED), (PD), and (SPLIT) as metrics. The results suggest that uncontrolled real estate development has greatly affected the ecological structure of the Lavasanat region by breaking the continuity of agricultural lands and replacing the large patches of these lands, which are of great ecological value, with smaller patches, which have far lower ecological value. Also, the results of the InVEST scenario-generator model and the water yield model showed an increase in the water yield of the Lavasanat watershed because of the expansion of built (residential) land-uses, which has led to increased runoff. These changes will have significant environmental consequences such as increased soil erosion, reduced regional groundwater recharge, and easier contaminant displacement, which will undermine the ecological security of the region.

Dear Dr E,

As the Editor of the journal International Journal of Environmental Science and Technology I want to ask you if you could review the article "Bridging the gap: linking morpho-functional traits' plasticity with hyperaccumulation" for a possible publication in our journal.

This is the abstract:
Plant species exhibiting heavy metal tolerance are instrumental in phytoremediation of metalliferous sites. Most of the times, variations in plant functional traits (PFTs), are overlooked while identifying hyperaccumulators. However, investigating morphological, physiological, and phenological variations () can contribute to our knowledge about stress tolerance, and aid in identifying potential hyperaccumulator. In the present study, we investigated variation in morph-functional traits in Solanum nigrum, a known hyperaccumulator, under Pb (Lead) stress. Twenty one PFTs including 9 above-ground (leaf count, leaf area, specific leaf area, leaf dry matter content, leaf thickness, leaf dry mass, shoot length, stem dry mass, stem diameter), 3 below-ground (root length, root dry mass, and root diameter), 4 reproductive (flower bud count, fruit count, flower count and fruit dry mass) and 5 photosynthetic traits (total chlorophyll, total carotenoid, chlorophyll a, chlorophyll b, and photosynthetic efficiency) under varying Pb concentrations (500-2000 mg kg-1) were assessed. Pillai's trace test (MANOVA) depicted significant variations in above-ground, below-ground, and photosynthetic traits, whereas, reproductive traits did not vary significantly with progressive metal concentration. However, most of the studied traits except flower count, fruit dry mass, and chlorophyll b varied significantly under Pb stress. The study depicts that enhanced PFT's plasticity enables S. nigrum to grow in Pb-contaminated soil effectively without impacting plant fitness. Plasticity of morpho-functional traits, therefore, establishes itself as a resourceful approach in successful identification of phytoremediation capacity of a plant.

Dear Dr V:

I am writing to invite you to review the following manuscript which has been submitted to Applied Biochemistry and Biotechnology:

Manuscript Number: ABAB-D-21-00579

Title: Semecarpus anacardium Linn. leaf extract exhibits activities against breast cancer and prolongs the survival of tumor bearing mice

Rajesh Kumar Singh; Amit Ranjan; Ruchita Tripathi; Sumit Singh Verma; Vinamra Sharma; Monika Singh; Subash Chandra Gupta; Anil Kumar Singh

=====

Semecarpus anacardium Linn. is a commonly used Ayurvedic medicinal plant which nuts have been described in Ayurveda and Sidda system of medicine to treat clinical ailments such as vitiligo, inflamation, microbial infection, geriatric problem, baldness and neuro related problems.
In this study, anti-cancer activity of the leaves of Semecarpus anacardium Linn was evaluated for future drug development. The phytochemical screening was done by GC-MS analysis, cytotoxicity was examined using MTT assay, mode of cell death was evaluated by fluorescence microscopy and finally antitumor activity was determined in EAC cell induced tumor bearing mice. The ethyl acetate extract from the leaves of the plant induced cytotoxicity in cancer cells in a dose dependent manner (IC 50 : 0.57 µg/ml in MCF-7 cells) in different cancer cell lines. The non-malignant cells were relatively insensitive to the extract. The staining with acridine orange, ethidium bromide and DAPI confirmed that the extract induced apoptosis in cancer cells. Furthermore, the extract induced cell cycle arrest at G1 phase and suppressed cancer cell migration. An oral administration of the extract suppressed the tumor growth in mice model bearing ehrlich ascites carcinoma cells. The ethyl acetate
extract was also found to prolong the survival of tumor bearing mice.
Overall, these observations suggest the anticancer activities of the ethyl acetate extract of the leaves of S. anacardium . The study opens a new window to examine the phytochemical constituents from the leaves of the plant responsible for the anticancer activities.

Dear Dr V,

You may recall reviewing the manuscript Semecarpus anacardium Linn. leaf extract exhibits activities against breast cancer and prolongs the survival of tumor bearing mice for us. I am herewith inviting you to take a look at the revised manuscript.

Manuscript Number: ABAB-D-21-00579R1

Abstract: Semecarpus anacardium Linn. is a commonly used Ayurvedic medicinal plant which nuts have been described in Ayurveda and Sidda system of medicine to treat clinical ailments such as vitiligo, inflamation, microbial infection, geriatric problem, baldness and neuro related problems.
In this study, anti-cancer activity of the leaves of Semecarpus anacardium Linn was evaluated for future drug development. The phytochemical screening was done by GC-MS analysis, cytotoxicity was examined using MTT assay, mode of cell death was evaluated by fluorescence microscopy and finally antitumor activity was determined in Ehrlich Ascites Carcinoma (EAC) cell induced tumor bearing mice. The ethyl acetate extract from the leaves of the plant induced cytotoxicity in cancer cells in a dose dependent manner (IC 50 : 0.57 µg/ml in MCF-7 cells) in different cancer cell lines. The non-malignant cells were relatively insensitive to the extract. The staining with acridine orange, ethidium bromide and DAPI confirmed that the extract induced apoptosis in cancer cells. Furthermore, the extract induced cell cycle arrest at G1 phase and suppressed cancer cell migration. An oral administration of the extract suppressed the tumor growth in mice model bearing ehrlich ascites
carcinoma cells. The ethyl acetate extract was also found to prolong the survival of tumor bearing mice.
Overall, these observations suggest the anticancer activities of the ethyl acetate extract of the leaves of S. anacardium . The study opens a new window to examine the phytochemical constituents from the leaves of the plant responsible for the anticancer activities.

Dear Dr V:

I am writing to invite you to review the following manuscript which has been submitted to Applied Biochemistry and Biotechnology:

Manuscript Number: ABAB-D-21-00699

Title: Reactivities of γ- and α-glutamyl-cysteine to intracellular and extracellular glutathione metabolic enzymes

misa muraoka; Saki Yoshida; Moeka Ohno; Hideyuki Matsuura; Kazuya Nagano; Kazumasa Hirata

=====

Gamma-glutamyl-cysteine (γ-EC) is a precursor of glutathione (GSH) biosynthesis. To elucidate its biological function, the reactivity of γ-EC was investigated as a substrate for three intracellular and one extracellular GSH metabolic enzymes derived from mammals that mediate the antioxidant defense and xenobiotic removal functions of GSH. The enzyme reactivity of alpha-glutamyl-cysteine (α-EC), a chemically synthesized analogue of γ-EC, was also examined. Substrate specificities of γ-EC to glutathione peroxidase (GPx), glutathione S-transferase (GST), and γ-glutamyl transferase(GGT) were observed, but not to glutathione reductase (GR). The specificities of γ-EC to GPx and GST were significantly lower than those of GSH, whereas the specificity of γ-EC to GGT was comparable to that of GSH. Alpha-EC did not react with GPx and GR, and the reaction with GST was much smaller than that with GSH. However, the reactivity of α-EC to GGT was comparable to that of GSH and γ-EC.
Furthermore, the oxidized forms of γ-EC and α-EC reacted as substrates in a similar manner to the oxidized form of GSH, GSSG. We found for the first time that γ-EC, α-EC, and their oxidized forms could be substrates of GGT. These two glutamyl-cysteines, capable of reacting with GGT, are expected to supply GSH constituent amino acids, glutamate and cysteine, when present in plasma. Their comparable substrate specificities to those of GSH and mitigation of pro-oxidant effects due to lack of cysteinyl-glycine synthesis suggest that γ-EC and α-EC may contribute valuable antioxidant defense properties as food and cosmetic additives.

ABAB-D-21-00699R1 - Invitation to review revised MS

1 message

Applied Biochemistry and Biotechnology <em@editorialmanager.com> Tue, Sep 7, 2021 at 3:16 PM
Reply-To: Applied Biochemistry and Biotechnology <arni.santiago@springernature.com>
To: Lavanya V <lavanya.v241@gmail.com>

Dear Dr V,

You may recall reviewing the manuscript Reactivities of γ- and α-glutamyl-cysteine to intracellular and extracellular glutathione metabolic enzymes for us. I am herewith inviting you to take a look at the revised manuscript.

Manuscript Number: ABAB-D-21-00699R1

Abstract: Gamma-glutamyl-cysteine (γ-EC) is a precursor of glutathione (GSH) biosynthesis. To elucidate its biological function, the reactivity of γ-EC was investigated as a substrate for three intracellular and one extracellular GSH metabolic enzymes derived from mammals that mediate the antioxidant defense and xenobiotic removal functions of GSH. The enzyme reactivity of alpha-glutamyl-cysteine (α-EC), a chemically synthesized analogue of γ-EC, was also examined. Substrate specificities of γ-EC to glutathione peroxidase (GPx), glutathione S-transferase (GST), and γ-glutamyl transferase(GGT) were observed, but not to glutathione reductase (GR). The specificities of γ-EC to GPx and GST were significantly lower than those of GSH, whereas the specificity of γ-EC to GGT was comparable to that of GSH. Alpha-EC did not react with GPx and GR, and the reaction with GST was much smaller than that with GSH. However, the reactivity of α-EC to GGT was comparable to that of GSH and γ-EC. Furthermore, the oxidized forms of γ-EC and α-EC reacted as substrates in a similar manner to the oxidized form of GSH, GSSG. We found for the first time that γ-EC, α-EC, and their oxidized forms could be substrates of GGT. These two glutamyl-cysteines, capable of reacting with GGT, are expected to supply GSH constituent amino acids, glutamate and cysteine, when present in plasma. Their comparable substrate specificities to those of GSH and mitigation of pro-oxidant effects due to lack of cysteinyl-glycine synthesis suggest that γ-EC and α-EC may contribute valuable antioxidant defense properties as food and cosmetic additives.

Dear Dr V:

I am writing to invite you to review the following manuscript which has been submitted to Applied Biochemistry and Biotechnology:

Manuscript Number: ABAB-D-21-00583

Title: EVALUATION OF THE EXTENT OF OXIDATIVE STRESS IN BREAST CANCER PATIENTS OF INDIAN POPULATION

Lavanya Sundaresan; Lourdhu Mary; Jebasingh J

=====

ABSTRACT
Background and purpose: The atypical growth of cells that transforms into tumor in the ducts or lobules of the mammalian breast might lead to breast cancer, which is one of the chief causes for escalating mortality among women. Oxidative stress in a cell is evident due to surplus production of oxidants because of the hysterical functioning of the system that regulates them. One such secondary product produced due to oxidative stress is malondialdehyde (MDA), a product of lipid peroxidation. To quench the effect of oxidants, antioxidant system in the cell has a significant role. The imbalance between these two creates oxidative stress.
Methods: The present study, focused on assessing the oxidative stress ratio and evaluating the levels of malondialdehyde and total antioxidant status (TAS) in breast cancer patients and healthy controls. Blood samples from breast cancer patients and age matched controls (n= 30 each. MDA and TAS estimated by pursuing Thiobarbituric Acid Reactive Substance (TBARS) Assay and Ferric Reducing Antioxidant Power (FRAP) Assay respectively.
Results: The level of MDA in patients was significantly higher (172.7 ± 81.4 nM/mL) than that of controls (77.9 ± 49.5 nM/mL) (p=0.009) whereas the level of TAS in the patients (2551 ± 1298µM/L) was significantly lower to that of the controls (3631 ± 1123µM/L) (P=0.001). In addition, MDA and TAS levels correlated with respect to chemotherapy cycles in patients. Patients undertaking the final stage of chemotherapy treatment had shown reduced oxidative stress than the patients in initial stage of chemotherapy, presenting a promising recovery pattern.
Conclusion: The oxidative stress was evident in patients but the effectiveness of chemotherapy through drugs like cisplatin and food rich in antioxidants could elevate the health and morale of the patients along with suggestive antioxidant rich diet to recover from the impairment.

Dear Dr V:

I am writing to invite you to review the following manuscript which has been submitted to Applied Biochemistry and Biotechnology:

Manuscript Number: ABAB-D-21-00684

Title: Nanoparticle synthesis from biowaste and its potential as an antimicrobial agent

Rishana Saffar; Athira P V; Kangkana Kalita; Suba G A Manuel; Pradeep N

=====

Biosynthesized nanoparticles are gaining more importance because of their unique biological applications and can be synthesised using biowastes like fruit peels that acts as a better alternative against conventional physical and chemical methods. This work reports an ecofriendly, reliable and cost-effective synthesis of silver and zinc oxide nanoparticles (Ag and ZnO NPs) chemically and biologically using fresh peel extracts of Punica granatum and Musa acuminata . The synthesised nanoparticles were characterized using UV-Visible spectroscopy, X-ray Diffraction (XRD), Scanning electron microscopy (SEM) and Energy dispersive X-ray analysis (EDS). The size of chemically and biosynthesized Ag and ZnO NPs ranged around 12-20 nm and 0.4-24 nm respectively. Both biosynthesized Ag and ZnO NPs were found to be nanospheres whereas chemically synthesised ZnO NPs were nanoflakes and showed maximum absorbance in the range of 250-550nm. Antimicrobial properties of the synthesized nanoparticles were assessed by well diffusion method against Gram negative Escherichia coli and Gram-positive Bacillus subtilis . Biosynthesized Ag NPs were found to be more efficient against E. coli as compared to ZnO NPs wherein biosynthesized M. acuminata Ag NPs exhibiting maximum zone of inhibition (28.4±14.66mm). Similarly, biosynthesized ZnO NPs were more efficient against B. subtilis as compared to biosynthesized Ag NPs wherein biosynthesized P. granatum ZnO NPs exhibiting maximum zone of inhibition (14.08±3.03mm). Hence biosynthesized NPs can be exploited as a potential candidate for antimicrobial agents. Scientific and systematic use of biowaste for NPs synthesis could in turn result in a sustainable solution for waste management.

Dear Dr V,

You may recall reviewing the manuscript Silver and Zinc Oxide Nanoparticle synthesis from biowaste and its potential as an antimicrobial agent for us. I am herewith inviting you to take a look at the revised manuscript.

Manuscript Number: ABAB-D-21-00684R1

Abstract: Biosynthesized Nanoparticles (NPs) are gaining more importance because of their unique biological applications and can be synthesized using biowastes like fruit peels that acts as a better alternative against conventional physical and chemical methods. This work reports an ecofriendly, reliable, and cost-effective synthesis of silver and zinc oxide NPs (Ag and ZnO NPs) chemically and biologically using fresh peel extracts of Punica granatum and Musa acuminata. The synthesized NPs were characterized using UV-Visible spectroscopy, X-ray Diffraction (XRD), Scanning electron microscopy (SEM) and Energy dispersive X-ray analysis (EDS). The size of chemically and biosynthesized Ag and ZnO NPs ranged around 12-20 nm and 0.4-24 nm respectively. Both biosynthesized Ag and ZnO NPs were found to be nanospheres whereas chemically synthesized ZnO NPs were nanoflakes and showed maximum absorbance in the range of 250-550nm. Antimicrobial properties of the synthesized NPs were assessed by well diffusion method against Gram negative Escherichia coli and Gram-positive Bacillus subtilis. Biosynthesized Ag NPs were found to be more efficient against E. coli as compared to ZnO NPs wherein biosynthesized M. acuminata Ag NPs exhibiting maximum zone of inhibition (28.4±14.66mm). Similarly, biosynthesized ZnO NPs were more efficient against B. subtilis as compared to biosynthesized Ag NPs wherein biosynthesized P. granatum ZnO NPs exhibiting maximum zone of inhibition (14.08±3.03mm). Hence biosynthesized NPs can be exploited as a potential candidate for antimicrobial agents. Scientific and systematic use of biowaste for NPs synthesis could in turn result in a sustainable solution for waste management.

Dear Dr V:

I am writing to invite you to review the following manuscript which has been submitted to Applied Biochemistry and Biotechnology:

Manuscript Number: ABAB-D-21-00747

Title: Gelidiella acerosacompounds target NFKB cascade in lung adenocarcinoma

Fazeela Mahaboob Begum S.M; S Hemalatha

=====

In carcinogenesis, increased metabolism, abnormal functioning of mitochondria, peroxisomes, aberrant cell signaling and prolonged inflammation can result in the overproduction of reactive oxygen species (ROS). In turn, excess ROS can upregulate the expression of various signaling pathways including the MAP kinase, PI3K/Akt and NFKB cascades in cancer. The constitutive expression of NFKB causes drug resistance in lung cancer. Hence, drugs that can enhance the antioxidant activity of enzymes and regulate the NFKB activity are of prime target to manage the drug resistance and inflammation in cancer. This study evaluated the effect of compounds present in ethyl acetate extract of Gelidiella acerosa on inflammation and on antioxidant enzymes in lung cancer. The anti-inflammatory activity was determined under in silicoandin vitro conditions. The in silico analysis showed that the phyto-constituents of G.acerosa inhibit the IKBα-NFKB-p65-p50 complex in a similar way as that
of doxorubicin and dexamethasone. Similarly , G.acerosa treatment enhanced the efficiency of antioxidant enzymes peroxidases and superoxide dismutase in A549 lung cancer cells. Further, the results of in vitro analysis showed that G.acerosa can inhibit the activation of NFKB, production of proinflammatory cytokines and upregulate the expression of IL 10. As inflammation causes cancer progression, the inhibition of inflammation inhibits tumorigenesis. Hence, based on the results of the study, it can be concluded that G.acerosa exerts anti- inflammatory activity through inhibition of NFKB cascade and moreover,the phyto-constituents of G.acerosa may have the potential to treat cancer successfully.

Dear Dr V,

You may recall reviewing the manuscript Gelidiella acerosa compounds target NFκB cascade in lung adenocarcinoma for us. I am herewith inviting you to take a look at the revised manuscript.

Manuscript Number: ABAB-D-21-00747R1

Abstract: In carcinogenesis, increased metabolism, abnormal functioning of mitochondria, peroxisomes, aberrant cell signaling and prolonged inflammation can result in the overproduction of reactive oxygen species (ROS). In turn, excess ROS can upregulate the expression of various signaling pathways including the MAP kinase, PI3K/Akt and NFκB cascades in cancer. The constitutive expression of NFκB causes drug resistance in lung cancer. Hence, drugs that can enhance the antioxidant activity of enzymes and regulate the NFκB activity are of prime target to manage the drug resistance and inflammation in cancer. This study evaluated the effect of compounds present in ethyl acetate extract of Gelidiella acerosa on inflammation and on antioxidant enzymes in lung cancer. The anti-inflammatory activity was determined under in silico and in vitro conditions. The in silico analysis showed that the phyto-constituents of G.acerosa inhibit the IKBα-NFκB-p65-p50 complex in a similar way as
that of doxorubicin and dexamethasone .Similarly, G.acerosa treatment enhanced the efficiency of antioxidant enzymes peroxidases and superoxide dismutase in A549 lung cancer cells. Further, the results of in vitro analysis showed that G.acerosa can inhibit the activation of NFκB, production of proinflammatory cytokines and upregulate the expression of IL 10. As inflammation causes cancer progression, the inhibition of inflammation inhibits tumorigenesis. Hence, based on the results of the study, it can be concluded that G.acerosa exerts anti- inflammatory activity through inhibition of NFκB cascade and moreover,the phyto-constituents of G.acerosa may have the potential to treat cancer successfully.

Dear Dr V,

You may recall reviewing the manuscript Gelidiella acerosa compounds target NFκB cascade in lung adenocarcinoma for us. I am herewith inviting you to take a look at the revised manuscript.

Manuscript Number: ABAB-D-21-00747R2

Abstract: In carcinogenesis, increased metabolism, abnormal functioning of mitochondria, peroxisomes, aberrant cell signaling and prolonged inflammation can result in the overproduction of reactive oxygen species (ROS). In turn, excess ROS can upregulate the expression of various signaling pathways including the MAP kinase, PI3K/Akt and NFκB cascades in cancer. The constitutive expression of NFκB causes drug resistance in lung cancer. Hence, drugs that can enhance the antioxidant activity of enzymes and regulate the NFκB activity are of prime target to manage the drug resistance and inflammation in cancer. This study evaluated the effect of compounds present in ethyl acetate extract of Gelidiella acerosa on inflammation and on antioxidant enzymes in lung cancer. The anti-inflammatory activity was determined under in silico and in vitro conditions. The in silico analysis showed that the phyto-constituents of G. acerosa inhibit the IKBα-NFκB-p65-p50 complex in a similar way as
that of doxorubicin and dexamethasone. Similarly, G.acerosa treatment enhanced the efficiency of antioxidant enzymes peroxidases and superoxide dismutase in A549 lung cancer cells. Further, the results of in vitro analysis showed that G.acerosa can decrease the activation of NFκB, production of proinflammatory cytokines and upregulate the expression of IL 10. As inflammation causes cancer progression, the inhibition of inflammation inhibits tumorigenesis. Hence, based on the results of the study, it can be concluded that G.acerosa exerts anti- inflammatory activity by decreasing the expression of NFκB cascade and moreover, the phyto-constituents of G.acerosa may have the potential to regulate the inflammatory response.

Invitation to Peer Review #ABAB-D-21-00763

1 message

Neesar Ahmed <em@editorialmanager.com> Tue, Aug 17, 2021 at 11:08 AM
Reply-To: Neesar Ahmed <neesar.sis@crescent.education>
To: Lavanya V <lavanya.v241@gmail.com>

Dear Dr V:

I am writing to invite you to review the following manuscript which has been submitted to Applied Biochemistry and Biotechnology:

Manuscript Number: ABAB-D-21-00763

Title: Phytochemicals target Growth Factor Receptors to control cancer: An In silico study

Love Edet Mendie; S Hemalatha

=====
Drug delivery in a safe manner is a major challenge in the drug development process. Growth factor receptors (GFRs) are known to have profound roles in the growth and progression of cancerous cells making these receptors a therapeutic target in the effective treatment of cancer. This work focused on exploring bioactive compounds that can target GFRs using in-silico method. In this study, 50 bioactive compounds from different plant sources were screened as anticancer agent against GFRs using drug likeness parameters of Lipinski's rule of five. The molecular docking was performed between phytochemicals and GFRs. Ligands with acceptable drug likeness and binding energy comparable to the standard drugs were further screened to determine their pharmacokinetic activities. This study showed phytochemicals with the binding energy comparable with the standard drugs (Dovitinb and Geftinib), while ADME, bioactivity score and bioavailability radar analysis gave further insight on
these compounds as potent anticancer agents.

To view the manuscript, please click here: https://www.editorialmanager.com/abab/l.asp?i=318177&l=2AIG8DDR

We hope you are willing to review the manuscript. If so, would you be so kind as to return your review to us by 07 Sep 2021? Thank you.

In case you accept to review this submission please click on this link:

https://www.editorialmanager.com/abab/l.asp?i=318178&l=TOO7F10R

If you are willing to review but cannot do so immediately, please click the above URL to accept the invitation. You can then access the manuscript, via the online site.

Your username is: LavanyaV-893
If you forgot your password, you can click the 'Send Login Details' link on the EM Login page at https://www.editorialmanager.com/abab/.

To decline this invitation, click here: https://www.editorialmanager.com/abab/l.asp?i=318179&l=0EQ11XS6

Please either accept or decline this invitation online. Please DO NOT send your reply by return email.

If you have any questions, please do not hesitate to contact us. We appreciate your assistance.

Sincerely,

Neesar Ahmed
Applied Biochemistry and Biotechnology

Dear Dr V:

I am writing to invite you to review the following manuscript which has been submitted to Applied Biochemistry and Biotechnology:

Manuscript Number: ABAB-D-21-00942

Title: Antioxidant and Angiotensin Converting Enzyme Inhibitory Activities of Some Sulfur Compounds

Sebahat YILMAZ; Bertan Boran BAYRAK; Refiye YANARDAG

=====

The angiotensin converting enzyme (ACE, EC 3.4.15.1), a peptidyl-dipeptidase, catalyzes the conversion of angiotensin I to a key vasoconstrictor angiotensin II in renin-angiotensin-aldosterone (RAAS) system, thus playing an important role in both regulating blood pressure and maintaining fluid/electrolyte/salt balances through RAAS. Free radicals are continuously produced in the biological system. Therefore, organisms need both exogenous and endogenous antioxidants to guard against the damage caused by these free radicals. In this way, they prevent the occurrence of numerous diseases via protecting cellular components and biomolecules. The main objective of the current study was to investigate the ACE inhibitory and antioxidant activities of sulfur compounds (e.g., cystine, methionine, S-benzyl-L-cysteine (SBC), S-methyl-L-cysteine (SMC), S-phenyl-L-cysteine (SPC), and taurine). It was observed that the ACE inhibitory and antioxidant activities of all sulfur compounds
increased with increase in concentration. Among these compounds, methionine had the highest ACE inhibitory and antioxidant activity based on reducing power, DPPH radical scavenging and ORAC methods. Cystine on the other hand had the highest ABTS radical scavenging, FRAP and nitrite scavenging activities. However, SPC and SBC exhibited the lowest ACE inhibitory and antioxidant activity among the tested compounds, respectively. These outcomes indicate that sulfur compounds have both ACE inhibitory and antioxidant activities and may serve as gateways for researches toward understanding the beneficial pharmacological effects against cell damage caused by oxidative stress of sulfur compounds.

Municipal solid waste and date molasses for the production of cellulases in solid state fermentation using a thermophilic Trichoderma reesei Al-Dhabi 149 in tray reactor

Naif Al-Dhabi; Mariadhas Valan Arasu

Dear Amala Lourthuraj,

I would like to invite you to review the above referenced manuscript submitted by Dr Mariadhas Valan Arasu , as I believe it falls within your expertise and interest. The abstract for this manuscript is included below.

You should treat this invitation, the manuscript and your review as confidential. You must not share your review or information about the review process with anyone without the agreement of the editors and authors involved, even after publication. This also applies to other reviewers' "comments to author" which are shared with you on decision (and vice versa).

Please respond to this invitation at your earliest opportunity.

If you would like to review this paper, please click this link:
https://www.editorialmanager.com/eti/l.asp?i=259544&l=XQDA3L28

If you have a conflict of interest or do not wish to review this paper, please click this link:
https://www.editorialmanager.com/eti/l.asp?i=259545&l=4CQUGZ5I

If you decline to review I would appreciate your suggestions for alternate reviewers.

If, for any reason, the above links do not work, please log in as a reviewer at https://www.editorialmanager.com/eti/

Since timely reviews are of utmost importance to authors, I would appreciate receiving your review within 21 days of accepting this invitation.
Once you submitted your review, you will receive a notification from Elsevier's reviewer recognition platform, which provides you with a link to your "My Elsevier Reviews" private profile page. You can collect your review certificates, editor recognition as well as discounts for Elsevier services from your profile page.

I hope you will be able to review this manuscript.
Thank you in advance for your contribution and time.

As a reviewer you are entitled to complimentary access to references, abstracts, and full-text articles on ScienceDirect and Scopus for 30 days. Full details on how to claim your access via Reviewer Hub (reviewerhub.elsevier.com) will be provided upon your acceptance of this invitation to review.

Please visit the Elsevier Reviewer Hub (reviewerhub.elsevier.com) to manage all your refereeing activities for this and other Elsevier journals on Editorial Manager.

Kind regards,

Sivakumar Pandian

Managing Guest Editor

Environmental Technology & Innovation

Please also note that authors have been invited to convert their supplementary material into a Data in Brief article (a data description article). You may notice this change alongside the revised manuscript. You do not need to review this but may need to look at the files in order to confirm that any supporting information you requested is present there.

*****

Please also note that authors have been invited to convert methods-related supplementary material into a MethodsX article (a detailed description of their methods). You may notice this change alongside the revised manuscript. You do not need to review this but may need to look at the files in order to confirm that any supporting information you requested is present there

Abstract:

The main aim of this study is to utilize municipal solid waste (MSW) and date molasses as a culture medium to reduce the production cost of enzymes. A novel cellulase producing fungus, Trichoderma reesei Al-Dhabi 149 was isolated from the date molasses. MSW and date molasses were processed and used as the substrate (1:1 ratio) in solid state fermentation. The proximate composition of the substrate revealed that the MSW enriched with cellulostic material and contributed about 33% of the available biomass. The elements such as, Ca, K, S, P, Mg, Fe, Cu and Na were found in the MSW. Fungal cellulase production was attained maximum after 96 h incubation with the yields of β-glucanase (98 ± 3.9 U/gds), carboxymethyl cellulase (CMCase) (241 ± 12.8 U/gds) and filter paperase (FPase) (31.2 ± 3.1 U/gds). The combination of municipal solid waste and date molasses were found to be the best source of nitrogen and carbon for the biosynthesis of cellulase by T. reesei Al-Dhabi 149. Optimum
temperature and moisture content of the medium for cellulases production by T. reesei Al-Dhabi 149 were 40 °C, and 60%, respectively. Optimum pH and inoculum were, 6.0 and 8% (v/w), respectively. The optimized culture condition was used to produce cellulases in a laboratory scale tray reactor and enzyme production enhanced 2-fold than unoptimized medium. The cellulolytic ability was tested in biomass saccharification with various plant materials (palm saw dust, palm leaves, palm fruit waste and filter paper) and saccharified plant materials successfully. These findings revealed that the enzymes secreted by strain Al-Dhabi 149 may have significant value for industrial saccharification process.

This is an automated message.

Manuscript Number: ETI_2020_1282
Municipal solid waste and date molasses for the production of cellulases in solid state fermentation using a thermophilic Trichoderma reesei Al-Dhabi 149 in tray reactor

Dear Amala Lourthuraj,

Thank you for agreeing to review the above referenced manuscript.

Timely reviews are of utmost importance to authors, therefore I would be grateful if you would please submit your review by Sep 11, 2021.

Please read the following instructions carefully before starting your evaluation:

https://www.elsevier.com/reviewers/how-to-conduct-a-review

Please also note these important ethical guidelines all reviewers are asked to follow:

* You should treat the manuscript and your review as confidential. You must not share your review or information about the review process with anyone without the agreement of the editors and authors involved, even after publication. This also applies to other reviewers' "comments to author" which are shared with you on decision (and vice versa).

* If you suspect plagiarism, fraud or have other ethical concerns, please raise your suspicions with the editor, providing as much detail as possible.

* Any suggestion you make that the author include citations to your (or your associates') work must be for genuine scientific reasons and not with the intention of increasing your citation counts or enhancing the visibility of your work (or those of your associates).

To view the manuscript, please click here: https://www.editorialmanager.com/eti/l.asp?i=260776&l=YJWJ2CE1.

When you are ready to submit your review, you may access the submission record here https://www.editorialmanager.com/eti/l.asp?i=260777&l=LB7ITTBT. Please click on the "Submit Recommendation" link to enter your comments.

If, for any reason, the above link does not work, please log in as a reviewer at https://www.editorialmanager.com/eti/.

As a reviewer you are entitled to complimentary access to ScienceDirect and Scopus. This 30-day access can be activated in the [Rewards] section of your profile in Reviewer Hub (reviewerhub.elsevier.com) and you have six months to activate it.

Please visit the Elsevier Reviewer Hub (reviewerhub.elsevier.com) to manage all your refereeing activities for this and other Elsevier journals on Editorial Manager.

I look forward to receiving your review soon.

Thank you in advance for your contribution and time.

Kind Regards,

Sivakumar Pandian
Managing Guest Editor
Environmental Technology & Innovation

Manuscript Number: ETI_2020_1282

Municipal solid waste and date molasses for the production of cellulases in solid state fermentation using a thermophilic Trichoderma reesei Al-Dhabi 149 in tray reactor

Naif Al-Dhabi; Mariadhas Valan Arasu

Dear Amala Lourthuraj,

Thank you for reviewing the above referenced manuscript. I greatly appreciate your contribution and time, which not only assisted me in reaching my decision, but also enables the author(s) to disseminate their work at the highest possible quality. Without the dedication of reviewers like you, it would be impossible to manage an efficient peer review process and maintain the high standards necessary for a successful journal.

You will shortly receive a notification from Elsevier's reviewer recognition platform, which provides you with a link to your "My Elsevier Reviews" private profile page, certificates, editor recognition as well as discounts for Elsevier services.

I hope that you will consider Environmental Technology & Innovation as a potential journal for your own submissions in the future.

As a token of appreciation, we would like to provide you with a review recognition certificate on Elsevier Reviewer Hub (reviewerhub.elsevier.com). Through the Elsevier Reviewer Hub, you can also keep track of all your reviewing activities for this and other Elsevier journals on Editorial Manager.

If you have not yet activated your 30 day complimentary access to ScienceDirect and Scopus, you can still do so via the [Rewards] section of your profile in Reviewer Hub (reviewerhub.elsevier.com).
You can always claim your 30-day access period later, however, please be aware that the access link will expire six months after you have accepted to review.

Kind regards,

Sivakumar Pandian

Review- 1- Fluoride removal by low cost palm shell activated carbon modified with prawn shell chitosan adsorbents

JEST: Reviewer Invitation for Fluoride removal by low cost palm shell activated carbon modified with prawn shell chitosan adsorbents

Inbox

Gobinath Ravindran <em@editorialmanager.com> Thu, Aug 06, 2021, 3:52 PM

to me

CC: gobinathdpi@gmail.com, r.gobinath2013@vit.ac.in

Dear Dr J, Jayanthi

As the Editor of the journal International Journal of Environmental Science and Technology I want to ask you if you could review the article " Fluoride removal by low cost palm shell activated carbon modified with prawn shell chitosan adsorbents " for a possible publication in our journal.

This is the abstract:
Plant species exhibiting heavy metal tolerance are instrumental in phytoremediation of metalliferous sites. Most of the times, variations in plant functional traits (PFTs), are overlooked while identifying hyperaccumulators. However, investigating morphological, physiological, and phenological variations () can contribute to our knowledge about stress tolerance, and aid in identifying potential hyperaccumulator. In the present study, we investigated variation in morph-functional traits in Solanum nigrum, a known hyperaccumulator, under Pb (Lead) stress. Twenty one PFTs including 9 above-ground (leaf count, leaf area, specific leaf area, leaf dry matter content, leaf thickness, leaf dry mass, shoot length, stem dry mass, stem diameter), 3 below-ground (root length, root dry mass, and root diameter), 4 reproductive (flower bud count, fruit count, flower count and fruit dry mass) and 5 photosynthetic traits (total chlorophyll, total carotenoid, chlorophyll a, chlorophyll b,
and photosynthetic efficiency) under varying Pb concentrations (500-2000 mg kg-1) were assessed. Pillai's trace test (MANOVA) depicted significant variations in above-ground, below-ground, and photosynthetic traits, whereas, reproductive traits did not vary significantly with progressive metal concentration. However, most of the studied traits except flower count, fruit dry mass, and
chlorophyll b varied significantly under Pb stress. The study depicts that enhanced PFT's plasticity enables S. nigrum to grow in Pb-contaminated soil effectively without impacting plant fitness. Plasticity of morpho-functional traits, therefore, establishes itself as a resourceful approach in successful identification of phytoremediation capacity of a plant.

Reviewer Guidelines are now available to help you with your review: http://www.elsevier.com/wps/find/reviewershome.reviewers/reviewersguidelines

ABSTRACT:
In the current research, two mesoporous structures of sodium zincate [Na2Zn(OH)4] spheres and aggregated particles, has been synthesized from sulfonation of melamine-formaldehyde (MF) and then bounding [Na2Zn(OH)4] particles onto the surface of sulfonated melamine–formaldehyde (SMF). Furthermore, in the present synthetic methodology the zinc oxide (ZnO) thin films on sulfonated melamine–formaldehyde was formed via the chemical deposition, and thermal treatment techniques of the sodium zincate. Several spectroscopic and analytical methods proved the structural and morphological properties of sodium zincate mesoporous structures based on sulfonated melamine formaldehyde [SMF/Na2Zn(OH)4]. The experimental studies showed that these catalytic systems showed high activity in the Biginelli reaction for the synthesis of 3,4-dihydropyrimidin-2(1H)-one derivatives and will find recoverable potential application. The obtained results indicated that the synthesized mesoporous structures had a thermal stability near 300 °C, particle-size distribution around of 10–120 nm for spheres and the surface area of 6 and 2 m2/g for spheres and aggregated particles, respectively.

Ms. Ref. No.: MOLSTRUC-D-20-04201R2
Title: Shape-controlled synthesis of sodium zincate mesoporous structures based on sulfonated melamine formaldehyde and their application as catalysts for Biginelli reaction
Journal of Molecular Structure

Dear Dr. Rangasamy Rajmohan,

Thank you for agreeing to review manuscript number MOLSTRUC-D-20-04201R2 for Journal of Molecular Structure.

If possible, I would appreciate receiving your review by Jan 28, 2021.

To view the submission: https://www.editorialmanager.com/molstruc/l.asp?i=542589&l=HOYYPW4Q

Please note that, if present, we ask you to include Highlights and the Graphical Abstract in the reviewing process.

You may submit your comments online at the Editorial Manager: https://www.editorialmanager.com/molstruc/. Please login as a Reviewer using the following username and password:

Your username is: rangagncchem@gmail.com
If you need to retrieve password details, please go to:
https://www.editorialmanager.com/molstruc/l.asp?i=542590&l=TOHDR4FC

You may access the manuscript by selecting the "Pending Assignments" link on your Main Menu page. To submit your comments, please click on the "Submit Reviewer Recommendation" link. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed.

To assist you in the reviewing process, I am delighted to offer you full access to Scopus* for 30 days. With Scopus you can search for related articles, references and papers by the same author. You may also use Scopus for your own purposes at any time during the 30-day period. If you already use Scopus at your institute, having this 30 day full access means that you will also be able to access Scopus from home.

*Scopus is the world's largest abstract and citation database of research information and quality internet sources.

Using your EM login details, you can access Scopus from either the url below or the Scopus search bar that will appear at the top of your assignments page in EM
http://scopees.elsevier.com/ees_login.asp?journalacronym=MOLSTRUC&username=rangagncchem@gmail.com

The 30 day access period will start as soon as you activate your access to Scopus, however you have the option to save your 30 day access period, but note that it will expire six months after receiving this email.

Journal of Molecular Structure operates a manuscript transfer service to relevant title[s] in the field. This service gives authors the option, if they are unsuccessful in their original submission, to decide to have their manuscript transferred to another relevant journal without the need to resubmit or reformat.

We recognize that you are the experts in the field and we want to ensure that our editors fully utilize your comments and guidance. As such, your reviewer reports will also be internally transferred along with the manuscript to the editor of the receiving journal. This will also help to eliminate the risk of you receiving the same manuscript twice.

If you would prefer that your reviewer report is not transferred, you will be able to untick the agreement to transfer box

when submitting your review.

Overall with this service we are aiming to help facilitate and develop fast, effective and truly innovative solutions to improve the overall manuscript submission and peer review process for all individuals concerned.

As a reviewer you are entitled to complimentary access to ScienceDirect and Scopus. This 30-day access can be activated in the [Rewards] section of your profile in Reviewer Hub (reviewerhub.elsevier.com) and you have six months to activate it.

Please visit the Elsevier Reviewer Hub (reviewerhub.elsevier.com) to manage all your refereeing activities for this and other Elsevier journals on Editorial Manager.

Thank you in advance for your cooperation.

With kind regards,

Maofa Ge, Ph D
Editor
Journal of Molecular Structure

Reviewer Guidelines are now available to help you with your review: http://www.elsevier.com/wps/find/reviewershome.reviewers/reviewersguidelines

Please note any suggestion that the author includes citations to reviewers' (or their associates') work must be for genuine scientific reasons and not with the intention of increasing reviewers' citation counts or enhancing the visibility of reviewers' work (or that of their associates).

Reviewer Guidelines are now available to help you with your review: http://www.elsevier.com/wps/find/reviewershome.reviewers/reviewersguidelines

ABSTRACT:
An eco-friendly hybrid nanomaterial, the cobalt supported on nano-hydroxyapatite (Co@nHAP), which the nano-hydroxyapatite (nHAP) is a promising material for catalytic systems because of immobilization stability with metals or complexes, was fabricated by ultraviolet irradiation and calcination. The prepared hybrid nanomaterial (Co@nHAP) was characterized by FT-IR, XRD, FESEM, EDX, and mapping, and the cobalt ions were founded to be incorporated into the hydroxyapatite surface. The Co@nHAP nanomaterial was used as a catalyst in the reduction of 2-nitrophenol (2-NP) and Rhodamine B (Rh B) and for the first time, the Co@nHAP type nanomaterial was tested as a counter electrode in the dye-sensitized solar cells (DSSC). The catalytic conversions of Co@nHAP nanomaterial were founded as 97.8% at 12 min. for 2-NP and 86.7% at 15 min. for Rh B and the reusability work for the 2-NP was performed as I - V cycles between 97.8%, to 85.8%, respectively. Also, the power conversion efficiencies (PCEs) of Co@nHAP and Co@nHAP/CNT in the DSSC devices as a counter electrode (reduction layer) were recorded as 0.05% and 0.36%, respectively. These model tests for the development of low cost and effective catalysts show promise.

To: Rangasamy Rajmohan <rangagncchem@gmail.com>

Ms. Ref. No.: MOLSTRUC-D-21-00382
Title: Performance Improvement of Co@nHAP Hybrid Nanomaterial in the UV light-supported Degradation of Organic Pollutants and Photovoltaics as Counter Electrode
Journal of Molecular Structure

Dear Dr. Rangasamy Rajmohan,

Thank you for agreeing to review manuscript number MOLSTRUC-D-21-00382 for Journal of Molecular Structure.

If possible, I would appreciate receiving your review by Feb 10, 2021.

To view the submission: https://www.editorialmanager.com/molstruc/l.asp?i=549307&l=ROROLK76

Please note that, if present, we ask you to include Highlights and the Graphical Abstract in the reviewing process.

You may submit your comments online at the Editorial Manager: https://www.editorialmanager.com/molstruc/. Please login as a Reviewer using the following username and password:

Your username is: rangagncchem@gmail.com
If you need to retrieve password details, please go to:
https://www.editorialmanager.com/molstruc/l.asp?i=549308&l=RW48SRH0

You may access the manuscript by selecting the "Pending Assignments" link on your Main Menu page. To submit your comments, please click on the "Submit Reviewer Recommendation" link. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed.

To assist you in the reviewing process, I am delighted to offer you full access to Scopus* for 30 days. With Scopus you can search for related articles, references and papers by the same author. You may also use Scopus for your own purposes at any time during the 30-day period. If you already use Scopus at your institute, having this 30 day full access means that you will also be able to access Scopus from home.

*Scopus is the world's largest abstract and citation database of research information and quality internet sources.

Using your EM login details, you can access Scopus from either the url below or the Scopus search bar that will appear at the top of your assignments page in EM
http://scopees.elsevier.com/ees_login.asp?journalacronym=MOLSTRUC&username=rangagncchem@gmail.com

The 30 day access period will start as soon as you activate your access to Scopus, however you have the option to save your 30 day access period, but note that it will expire six months after receiving this email.

Journal of Molecular Structure operates a manuscript transfer service to relevant title[s] in the field. This service gives authors the option, if they are unsuccessful in their original submission, to decide to have their manuscript transferred to another relevant journal without the need to resubmit or reformat.

We recognize that you are the experts in the field and we want to ensure that our editors fully utilize your comments and guidance. As such, your reviewer reports will also be internally transferred along with the manuscript to the editor of the receiving journal. This will also help to eliminate the risk of you receiving the same manuscript twice.

If you would prefer that your reviewer report is not transferred, you will be able to untick the agreement to transfer box

Reviewer Guidelines are now available to help you with your review: http://www.elsevier.com/wps/find/reviewershome.reviewers/reviewersguidelines

ABSTRACT:
Stringent water resources scarcity and severe environmental restriction requires environmentally friendly and efficient scale inhibitors exploitation. Functionalization of polyamidoamine dendrimers (PAMAM) for scale inhibitor was performed using 2-phosphate-1, 2, 4-butane tricarboxylic acid (PBTCA) and succinic anhydride (SA). In this paper, PBTCA modified PAMAM G1 (PAMAM-1) and SA modified PAMAM G1 (CAMAM-1) or G2 (CAMAM-2) are prepared and compared with linear low molecular polyacrylic (LPAA) in scale inhibition efficiency of CaCO 3 and CaSO 4 by the static scale inhibition method. The results show that carboxyl terminated polyamidoamine dendrimers has excellent scale inhibition performance comparable to PBTCA and PAMAM-1. Compared to LPAA and PBTCA, dendritic structure can effectively improve the scale inhibition performance of the scale inhibitor. Furthermore, with the increase of generation of dendrimer, the better the scale inhibition performance. The inhibition efficiency of CAMAM-2 against CaCO 3 and CaSO 4 is about 96.3% and 95.2% at a concentration of 10 mg/L. Moreover, The CAMAM-2 perform above 85% scale inhibition at Ca 2+ concentration is 4000 mg/L and 90% scale inhibition at border pH 5-9. The FTIR, XRD and SEM results show that the CaCO 3 is transformed from stable calcite to metastable aragonite and vaterite, and the needle like structure of calcium sulfate is destroyed to small crystals. This paper provides data support for the application of phosphate or carboxyl terminated polyamidoamine dendrimer in scale inhibition.

Dear Sir,

This is to certify that Mr. ABHINAV VISHNI (Reg.No: 191314036001) is a bonafide student of our Institution, pursuing MBA first Year (II Semester / Full time 2019-2021 Batch). As a part of the curriculum the students are expected to pursue a one month internship programme after the second semester examination with a company. This candidate desires to do the internship in your esteemed organization.

Hence, we request you to consider the candidate for one month Internship.

Subject: Internship offer letter

Mr. R. Prasanth,

We are pleased to offer you, the post of Marketing Intern with Reach Skyline on the following terms and conditions:

1. Commencement of Internship

Your Internship will be effective as of Dec 8, 2020.

2. Internship title

Your internship title will be Marketing Intern and you will report to Ram K Krishnan (Chief Marketing Officer).

3. Duration of Internship

Your internship duration is for 3 month from the date of joining.

4. Place of posting

You will be posted at Chennai, Tamil Nadu. You may however be required to work at any place of business which the Company has, or may later acquire.

#84/5, II Floor, Skyline Tower, Sampoornam Avenue, Arcot Road, Vadapalani, Chennai - 600026
+91 81229 36337 | www.reachskyline.com | reachskyline@outlook.com

5. Nature of duties

You will perform to the best of your ability all the duties as are inherent in your post and such additional duties as the company may call upon you to perform, from time to time.

6. Company property

You will always maintain in good condition the company property, which may be entrusted to you for official use during the course of your employment and shall return all such property to the company prior to relinquishment of your charge, failing which the cost of the same will be recovered from you by the company.

7. Termination

In case of unsatisfactory performance, the supervisor has the right to terminate your employment after a 10-day notice period.

The company reserves the right to terminate your employment summarily without any notice period or termination payment, if it has reasonable grounds to believe you are guilty of misconduct or negligence, or have committed any fundamental breach of contract or caused any loss to the company.

On the termination of your employment for whatever reason, you will return to the Company all property: documents and paper, both original and copies thereof, including any samples, literature, contracts, records, lists, drawings, blueprints,

letters, notes, data and the like; and Confidential Information, in your possession or under your control relating to your employment or to clients' business affairs.

8. Confidential Information

During your employment with the company you will devote your whole time, and skill to the best of your ability for its business. You shall not, directly or indirectly, engage or associate yourself with, be connected with, concerned, employed or engaged in any other business or activities or any other post or work part time or pursue any course of study whatsoever, without the prior permission of the company.

TO WHOM IT MAY CONCERN

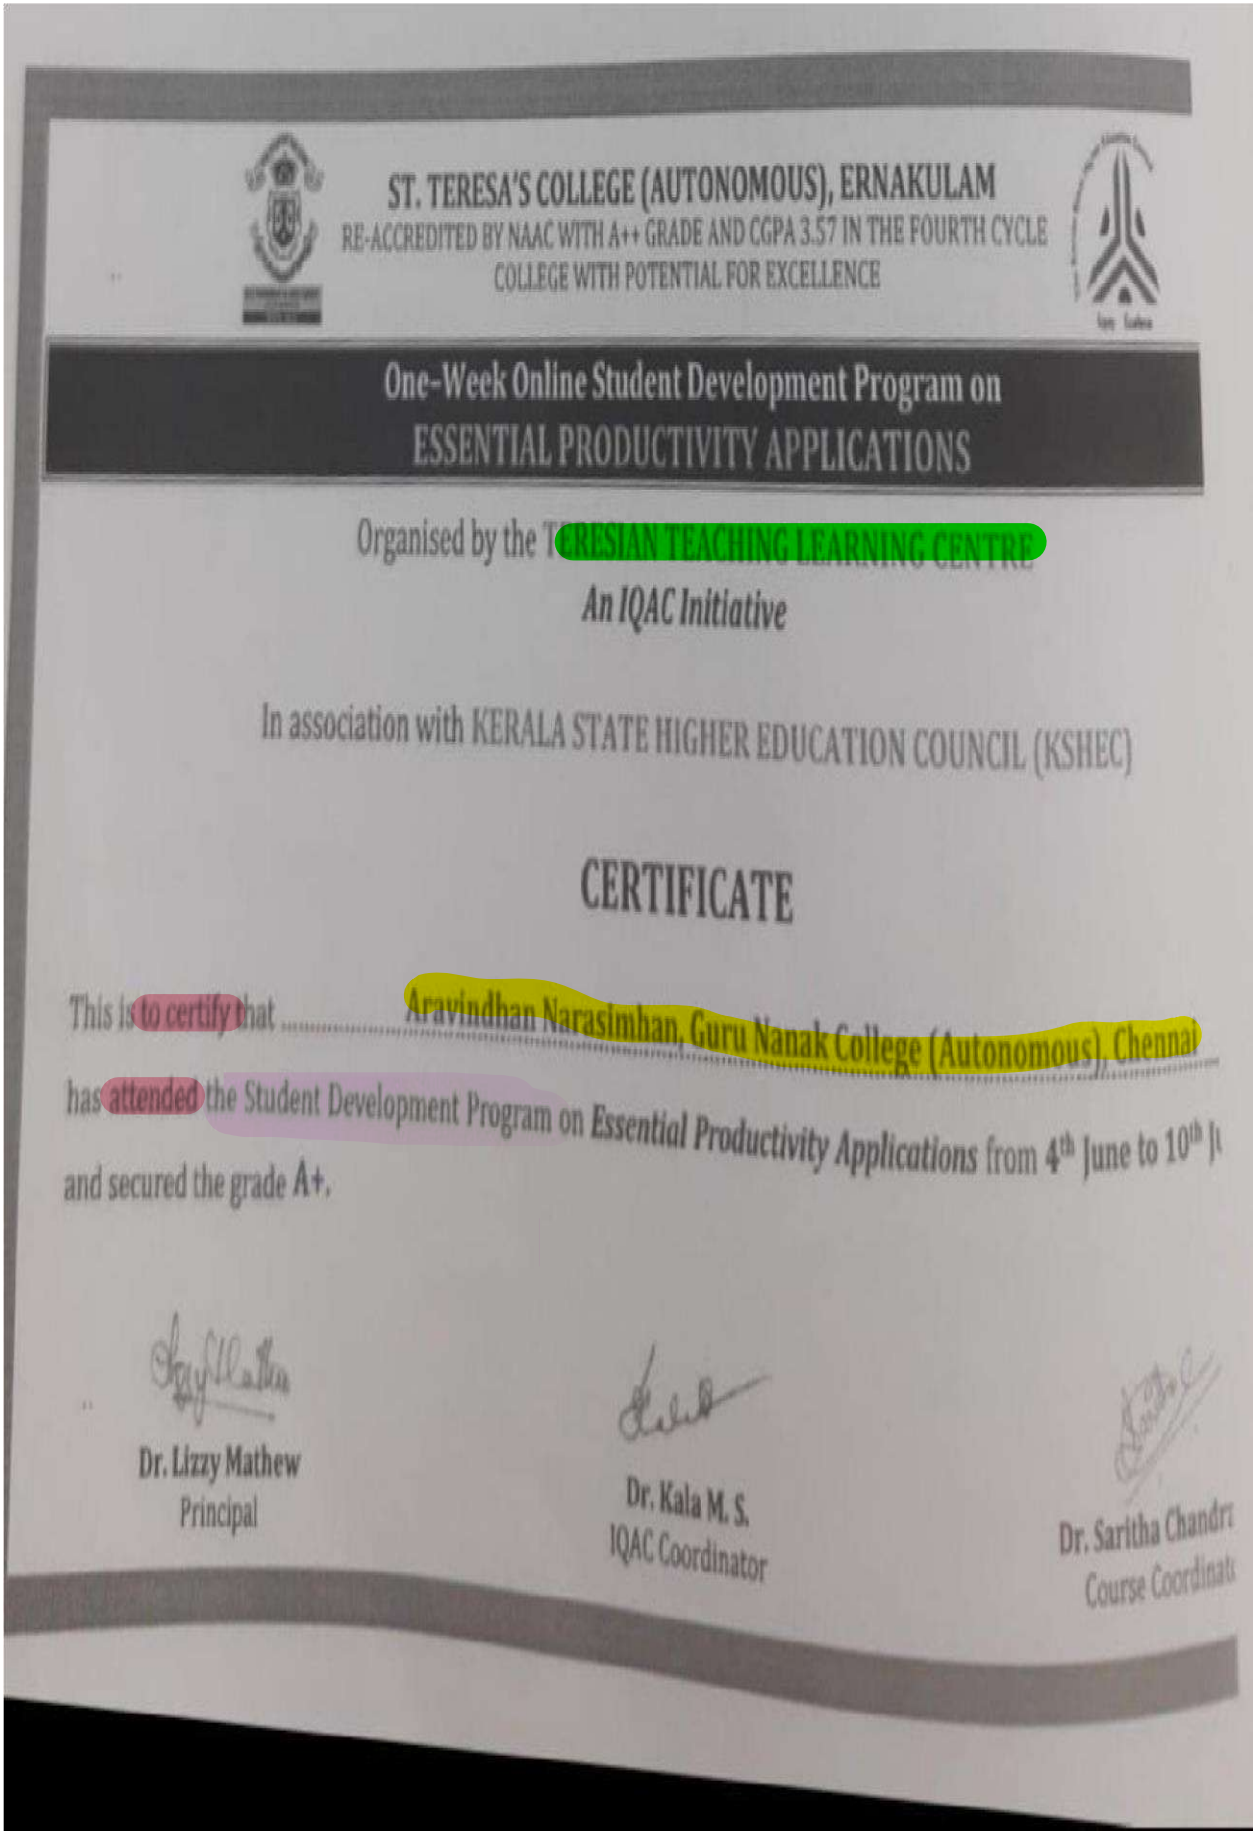

The Internship programme is part of the course curriculum of M.A., Defence & Strategic Studies. This internship has to be carried out after the second semester. The objective of the internship is to offer an opportunity for the students to express their scholastic knowledge in a real time working environment. This opportunity would of great value to the students to gauge their skills and also to decide their suitability in the chosen avocation.

We would much appreciate if your esteemed organisation could extend the facility for our students to hone their skills and also to identify their future career. It would of great value to do their internship in your organisation. Herewith, I am attaching the students name and registration number and their bio for your kind perusal.

Invitation to review for Journal of King Saud University - Science

Journal of King Saud University - Science <em@editorialmanager.com> Sat, Sep 5, 2020 at 9:54 PM
Reply-To: Journal of King Saud University - Science <jksus@elsevier.com>
To: "S. E. Noorjahan" <senoorjahan@gmail.com>

Manuscript Number: JKSUS-D-20-01148
Anti-Cancer Activity and Toxicity Study of HF8, A Poly-Herbal Formulation

Dear Noorjahan,

I would like to invite you to review the above referenced manuscript , as I believe it falls within your expertise and interest. The abstract for this manuscript is included below.

You should treat this invitation, the manuscript and your review as confidential. You must not share your review or information about the review process with anyone without the agreement of the editors and authors involved, even after publication. This also applies to other reviewers' "comments to author" which are shared with you on decision (and vice versa).

Please respond to this invitation at your earliest opportunity.

If you would like to review this paper, please click this link:
https://www.editorialmanager.com/jksus/l.asp?i=158290&l=CK5RTY66

If you have a conflict of interest or do not wish to review this paper, please click this link:
https://www.editorialmanager.com/jksus/l.asp?i=158291&l=WECEJFSV

If you decline to review, I would appreciate your suggestions for alternate reviewers.

If, for any reason, the above links do not work, please log in as a reviewer at https://www.editorialmanager.com/jksus/.

Since timely reviews are of utmost importance to authors, I would appreciate receiving your review within 30 days of accepting this invitation.

I hope you will be able to review this manuscript.

Thank you in advance for your contribution and time.

As a reviewer you are entitled to complimentary access to references, abstracts, and full-text articles on ScienceDirect and Scopus for 30 days. Full details on how to claim your access via Reviewer Hub (reviewerhub.elsevier.com) will be provided upon your acceptance of this invitation to review.

Please visit the Elsevier Reviewer Hub (reviewerhub.elsevier.com) to manage all your refereeing activities for this and other Elsevier journals on Editorial Manager.

Kind regards,

omar Al-Dossary

Anti-Cancer Activity and Toxicity Study of HF8, A Poly-Herbal Formulation

Dear Noorjahan,

Thank you for agreeing to review the above referenced manuscript.

Timely reviews are of utmost importance to authors, therefore I would be grateful if you would please submit your review by Oct 09, 2020.

Please read the following instructions carefully before starting your evaluation:

https://www.elsevier.com/reviewers/how-to-conduct-a-review

Please also note these important ethical guidelines all reviewers are asked to follow:

* You should treat the manuscript and your review as confidential. You must not share your review or information about the review process with anyone without the agreement of the editors and authors involved, even after publication. This also applies to other reviewers' "comments to author" which are shared with you on decision (and vice versa).

* If you suspect plagiarism, fraud or have other ethical concerns, please raise your suspicions with the editor, providing as much detail as possible.

* Any suggestion you make that the author include citations to your (or your associates') work must be for genuine scientific reasons and not with the intention of increasing your citation counts or enhancing the visibility of your work (or those of your associates).

To view the manuscript, please click here: https://www.editorialmanager.com/jksus/l.asp?i=158937&l=44FOXSK7.

When you are ready to submit your review, you may access the submission record here https://www.editorialmanager.com/jksus/l.asp?i=158938&l=XISXKEUT. Please click on the "Submit Recommendation" link to enter your comments.

If, for any reason, the above link does not work, please log in as a reviewer at https://www.editorialmanager.com/jksus/.

As a reviewer you are entitled to complimentary access to ScienceDirect and Scopus. This 30-day access can be activated in the [Rewards] section of your profile in Reviewer Hub (reviewerhub.elsevier.com) and you have six months to activate it.

Please visit the Elsevier Reviewer Hub (reviewerhub.elsevier.com) to manage all your refereeing activities for this and other Elsevier journals on Editorial Manager.

I look forward to receiving your review soon.

Thank you in advance for your contribution and time.

Kind Regards,

omar Al-Dossary

Dear Dr. Sheik Eusuff:

Thank you for submitting your review of this manuscript. Your time and expertise are greatly appreciated and your comments will help us make a decision regarding its publication in ACS Omega.

We appreciate the voluntary contribution that each reviewer gives to the journal, and we thank you for your participation in the online review process.

Please note that ACS will deposit credit for your completed review to your ORCID profile after an embargo period. For more information about the ACS Reviewer Credit program see https://publish.acs.org/publish/peer_reviews/reviewer_credit/

If you have not already done so I would very much appreciate if you could update your reviewer expertise on your ACS Paragon Plus home site.

Sincerely,

Prof. Sensuke Ogoshi

Subject: **Ms_CJAST_61814:** Invitation to Review Manuscript for Current Journal of Applied Science and Technology

Note: If you have already accepted or declined our invitation, you are politely requested to ignore this mail.

Dear Colleague,

I am approaching you with the peer-review request of the below mentioned manuscript.

Title: **Comparative Study of Enrollee Satisfaction with Private and Public Healthcare Providers of Community Based Health Insurance Scheme in Edu LGA, Kwara State**

I would be grateful if you would kindly find some time to review the above mentioned manuscript and send your valuable comments within **07 calendar days (05 Oct'2020).**

Complete manuscript and Review Form are available below. Please download them in your computer to start the review.

Complete manuscript: (https://ditdo.in/61814).

Review form: (https://ditdo.in/-61814).

If you cannot download this file and if you require the file as E-mail attachment kindly let us know.

2. Benefits for Reviewers

2.1 Certificate of peer reviewing: After completion of timely quality peer review, we'll be pleased to provide you official Certificate of peer reviewing (signed Scan copy). Please see a sample certificate here: http://ditdo.in/cert/CJAST.jpg

2.2 Publons: This journal is included in Publons (Link: https://tinyurl.com/publons-CJAST), a part of Web of Science Group. After completion of peer review, you'll get all the credit of your review works, which may help you officially in your academic career, promotion, research grants, etc.

2.3 Nomination for "Reviewer of the Month": After completion of timely quality peer review, you will be nominated for the "Reviewer of the Month" competition. Winners of the competition will get prestigious "Reviewer of the Month" certificate (signed Scan copy).

2.4 DOI reference for reviewer credit: If the paper is accepted for publication by the editor after peer review, then your name will be included in the front page of the published paper as reviewer. Then you can officially write the DOI number of the paper and title of the paper in your CV as part of your reviewer credit.

2.5 Annual Peer Reviewers' Hall of Fame (APR-HF 2020)*: Extraordinary reviewers will be included in "Annual Peer Reviewers' Hall of Fame". Photograph and short biography of selected reviewers will be published in APR-HF. This is an internationally circulated book with print and online ISBN numbers and DOI number. APR-HF book is promoted by Digital news channels, social media, scientific blog; you tube channel, digital press release, etc. (Link: http://www.scholarshof.com)

3. *Very politely we are requesting you to inform us by email within next 48 hrs if you agree to accept our review invitation.* If we don't receive your email, we'll move on next alternative reviewers. We hope as part of academic community you'll appreciate our efforts to complete quality peer review within stipulated time period. *Comments received after Peer Review Report Submission Deadline and without initial acknowledgement may not be utilized.*

4. Useful Links:

Journal scope link: http://www.journalcjast.com/index.php/CJAST/about

Peer Review Policy link: http://www.sciencedomain.org/page/sdi-general-editorial-policy

5. Please send back all the files (manuscript and review comments) to me as email attachment.

6. Kindly click on this link if you decline to our invitation: Declined to peer review

With Best Regards
Ms. Ruma Bag

To: Amalalourthuraj A <a.amalraaj@gmail.com>

Ms. Ref. No.: SJBS-D-20-01311
Title: Molecular diversity and hydrolytic enzymes production abilities of soil bacteria
Saudi Journal of Biological Sciences

Dear Dr. Amalalourthuraj A,

Given your expertise in this area, I would appreciate your comments on the above paper. I have included the abstract of the manuscript below to provide you with an overview.

If you accept this invitation, your comments will be due by Aug 30, 2020. If you are unable to act as a reviewer at this time, I would greatly appreciate your suggestions for alternate reviewers.

To accept this invitation, please click here:

https://www.editorialmanager.com/sjbs/l.asp?i=154143&l=2PQ3IAS0

To decline this invitation, please click here:

https://www.editorialmanager.com/sjbs/l.asp?i=154144&l=4LISHJ4U

Alternatively, you may also register your response by accessing the Editorial Manager via

1. Go to this URL: https://www.editorialmanager.com/SJBS/

2. Enter these login details:
Your username is: a.amalraaj@gmail.com
If you need to retrieve password details, please go to: Can't remember your password?
To reset your password please try to sign in and click 'continue'. On the next screen click the 'forgot password' link and follow the steps to reset your password.

3. Click [Reviewer Login]
This takes you to the Reviewer Main Menu.

4. Click [New Reviewer Invitations]

5. Click either [Agree to Review] or [Decline to Review]

I look forward to hearing from you in the near future.

Yours sincerely,

Abdullah S Alhomida, Ph D
Editor-in-Chief
Saudi Journal of Biological Sciences

ABSTRACT:
Soil is an integral part of ecosystem which is niche for varieties of microflora. The present study was investigated to isolate varied strains of bacteria from soil samples of three different geographical regions (Ambattur Industrial Estate - AIE, Neyveli Lignite Corporation - NLC, and Arignar Anna Zoological Park - AAZP) of Tamil Nadu (India) and evaluate

Ms. Ref. No.: SJBS-D-20-01311
Title: Molecular diversity and hydrolytic enzymes production abilities of soil bacteria
Saudi Journal of Biological Sciences

Dear Dr. Amalalourthuraj A,

Thank you for taking the time to review the above-referenced manuscript. You can access your comments and the decision letter when it becomes available.

To access your comments and the decision letter, please do the following:

1. Go to this URL: https://www.editorialmanager.com/sjbs/

2. Enter your login details

3. Click [Reviewer Login]

Thank you again for sharing your time and expertise.

As a token of appreciation, we would like to provide you with a review recognition certificate on Elsevier Reviewer Hub (reviewerhub.elsevier.com). Through the Elsevier Reviewer Hub, you can also keep track of all your reviewing activities for this and other Elsevier journals on Editorial Manager.

If you have not yet activated your 30 day complimentary access to ScienceDirect and Scopus, you can still do so via the [Rewards] section of your profile in Reviewer Hub (reviewerhub.elsevier.com).
You can always claim your 30-day access period later, however, please be aware that the access link will expire six months after you have accepted to review.

Yours sincerely,

Abdullah S Alhomida, Ph D
Editor-in-Chief
Saudi Journal of Biological Sciences

Ms. Ref. No.: SJBS-D-20-01325
Title: Studies on physicochemical and antibacterial deeds of amino acid based L-threoninum sodium bromide
Saudi Journal of Biological Sciences

Dear A. Amala Lourthuraj,

Given your expertise in this area, I would appreciate your comments on the above paper. I have included the abstract of the manuscript below to provide you with an overview.

If you accept this invitation, your comments will be due by Aug 25, 2020. If you are unable to act as a reviewer at this time, I would greatly appreciate your suggestions for alternate reviewers.

To accept this invitation, please click here:

https://www.editorialmanager.com/sjbs/l.asp?i=154520&l=02CKDGSF

To decline this invitation, please click here:

https://www.editorialmanager.com/sjbs/l.asp?i=154521&l=U4PS3HS7

Alternatively, you may also register your response by accessing the Editorial Manager via

1. Go to this URL: https://www.editorialmanager.com/SJBS/

2. Enter these login details:
Your username is: amalraj@gurunanakcollege.edu.in
If you need to retrieve password details, please go to: Can't remember your password?
To reset your password please try to sign in and click 'continue'. On the next screen click the 'forgot password' link and follow the steps to reset your password.

3. Click [Reviewer Login]
This takes you to the Reviewer Main Menu.

4. Click [New Reviewer Invitations]

5. Click either [Agree to Review] or [Decline to Review]

I look forward to hearing from you in the near future.

Yours sincerely,

Journal of King Saud University - Science <em@editorialmanager.com> Mon, Aug 3, 2020 at 2:42 PM
Reply-To: Journal of King Saud University - Science <jksus@elsevier.com>
To: Amala Lourthuraj <amalraj@gurunanakcollege.edu.in>

Manuscript Number: JKSUS-D-20-00513R2
Enhanced production, purification and biochemical characterization of therapeutic potential fibrinolytic enzyme from a new Bacillus flexus from marine environment

Dear Asst. Prof. Lourthuraj,

I would like to invite you to review the above referenced manuscript, as I believe it falls within your expertise and interest. The abstract for this manuscript is included below.

You should treat this invitation, the manuscript and your review as confidential. You must not share your review or information about the review process with anyone without the agreement of the editors and authors involved, even after publication. This also applies to other reviewers' "comments to author" which are shared with you on decision (and vice versa).

Please respond to this invitation at your earliest opportunity.

If you would like to review this paper, please click this link:
https://www.editorialmanager.com/jksus/l.asp?i=152987&l=OX6QYBYO

If you have a conflict of interest or do not wish to review this paper, please click this link:
https://www.editorialmanager.com/jksus/l.asp?i=152988&l=JC814G55

If you decline to review, I would appreciate your suggestions for alternate reviewers.

If, for any reason, the above links do not work, please log in as a reviewer at https://www.editorialmanager.com/JKSUS/.

Since timely reviews are of utmost importance to authors, I would appreciate receiving your review within 30 days of accepting this invitation.

I hope you will be able to review this manuscript.

Thank you in advance for your contribution and time.

As a reviewer you are entitled to complimentary access to references, abstracts, and full-text articles on ScienceDirect and Scopus for 30 days. Full details on how to claim your access via Reviewer Hub (reviewerhub.elsevier.com) will be provided upon your acceptance of this invitation to review.

Please visit the Elsevier Reviewer Hub (reviewerhub.elsevier.com) to manage all your refereeing activities for this and other Elsevier journals on Editorial Manager.

Kind regards,

omar Al-Dossary
Editor-in-Chief

Enhanced production, purification and biochemical characterization of therapeutic potential fibrinolytic enzyme from a new Bacillus flexus from marine environment

Dear Asst. Prof. Lourthuraj,

Thank you for agreeing to review the above referenced manuscript.

Timely reviews are of utmost importance to authors, therefore I would be grateful if you would please submit your review by Sep 07, 2020.

Please read the following instructions carefully before starting your evaluation:

https://www.elsevier.com/reviewers/how-to-conduct-a-review

Please also note these important ethical guidelines all reviewers are asked to follow:

* You should treat the manuscript and your review as confidential. You must not share your review or information about the review process with anyone without the agreement of the editors and authors involved, even after publication. This also applies to other reviewers' "comments to author" which are shared with you on decision (and vice versa).

* If you suspect plagiarism, fraud or have other ethical concerns, please raise your suspicions with the editor, providing as much detail as possible.

* Any suggestion you make that the author include citations to your (or your associates') work must be for genuine scientific reasons and not with the intention of increasing your citation counts or enhancing the visibility of your work (or those of your associates).

To view the manuscript, please click here: https://www.editorialmanager.com/jksus/l.asp?i=153927&l=MSL8N66P.

When you are ready to submit your review, you may access the submission record here https://www.editorialmanager.com/jksus/l.asp?i=153928&l=FYISX7YK. Please click on the "Submit Recommendation" link to enter your comments.

If, for any reason, the above link does not work, please log in as a reviewer at https://www.editorialmanager.com/jksus/.

As a reviewer you are entitled to complimentary access to ScienceDirect and Scopus. This 30-day access can be activated in the [Rewards] section of your profile in Reviewer Hub (reviewerhub.elsevier.com) and you have six months to activate it.

Please visit the Elsevier Reviewer Hub (reviewerhub.elsevier.com) to manage all your refereeing activities for this and other Elsevier journals on Editorial Manager.

I look forward to receiving your review soon.

Thank you in advance for your contribution and time.

Kind Regards,

Amala Lourthuraj <amalraj@gurunanakcollege.edu.in>

Dear Asst. Prof. Lourthuraj,

Thank you for reviewing the above referenced manuscript. I greatly appreciate your contribution and time, which not only assisted me in reaching my decision, but also enables the author(s) to disseminate their work at the highest possible quality. Without the dedication of reviewers like you, it would be impossible to manage an efficient peer review process and maintain the high standards necessary for a successful journal.

I hope that you will consider Journal of King Saud University - Science as a potential journal for your own submissions in the future.

As a token of appreciation, we would like to provide you with a review recognition certificate on Elsevier Reviewer Hub (reviewerhub.elsevier.com). Through the Elsevier Reviewer Hub, you can also keep track of all your reviewing activities for this and other Elsevier journals on Editorial Manager.

If you have not yet activated your 30 day complimentary access to ScienceDirect and Scopus, you can still do so via the [Rewards] section of your profile in Reviewer Hub (reviewerhub.elsevier.com).

Abdullah S Alhomida, Ph D
Editor-in-Chief
Saudi Journal of Biological Sciences

ABSTRACT:
Objective

Ovarian cancer (OC) is one of the most prevailing gynecological malignancies with high mortality rate, while E74 like ETS transcription factor 3 (ELF3) is reported to be associated with tumorigenesis. This work aims to validate the role of ELF3 in OC progression.

Methods

Expression of ELF3 in OC and its correlation with overall survival were predicted on a bioinformation system GEPIA. Then, the level of ELF3 in OC tissues and cells and in normal ones was evaluated. Binding relationships between ELF3 and microRNA (miR)-485-5p, and between miR-485-5p and claudin-4 (CLND4) were predicted through Bioinformatics tools. Altered expression of ELF3, miR-485-5p and CLND4 was introduced alone or jointly to probe their influences on OC cell growth.

Results

ELF3 was suggested to be highly expressed in OC, which was linked to poor prognosis in patients. Abundant expression of ELF3 was identified in OC tissues and cell lines as relative to the normal ones. ELF3 inhibition suppressed growth and metastasis of OC cells. ELF3 transcriptionally suppressed miR-485-5p expression to further enhance CLDN4 expression. Overexpression of miR-485-5p led to similar trends as ELF3 inhibition did. Importantly, upregulation of CLDN4 was found to block the roles of ELF3 inhibition in OC cells. In addition, the Wnt/signaling pathway suppressed by miR-485-5p mimic was reactivated following CLDN4 overexpression.

Conclusion

This study evidenced that ELF3 suppresses miR-485-5p transcription to enhance CLDN4 expression, leading to Wnt/β-catenin activation and promoting OC cell growth and metastasis. This work may provide new ideas for gene-based therapies for OC.

To: Rajmohan Rangasamy <rangagncchem@gmail.com>

Manuscript number: slct.202002977
Manuscript Type: Full Paper
Title: "Facile synthesis of novel pyrano-pyrido-carbazole scaffolds using magnetic Fe3O4 nanoparticles as a heterogeneous green and reusable catalyst"
Correspondence Author: Dr Divya Verma

Dear Rajmohan,

We would appreciate your assistance in evaluating the above-mentioned Full Paper for *ChemistrySelect*. The abstract for this manuscript is provided below along with details on how to access the manuscript PDF and any Supporting Information.

Please take a moment to indicate whether you are willing to evaluate this paper:

- ***To agree** to review this paper*: Agree to Review
- ***To decline** to review this paper*: Decline to Review

In the event that you are willing to evaluate this paper, please provide your report by: **07.08.2020**. Should you be unable to provide comments, we would welcome suggestions for alternative reviewers. However, please do not approach alternative reviewers directly, since as a referee you have the responsibility to treat the manuscript and your report as confidential

Thank you in advance for your prompt attention to this email, and in anticipation of a positive response, we look forward to receiving your report in due course.

Yours sincerely,

Dr Eric Wang
Associate Editor
ChemistrySelect

ABSTRACT:

We reported a novel series of pyrano-pyrido-carbazol derivatives (PPCDs) synthesized via the reaction of aryl/heteroaryl aldehyde, malononitrile and 4-hydroxypyridocarbazolone in water using Fe 3 O 4 magnetite nanoparticles (Fe 3 O 4 MNPs) as a heterogeneous novel catalyst at room temperature just in 60 mins under ultrasound. For this propose, Fe 3 O 4 MNPs with particle size 23.4±0.9 nm was successfully synthesized via a aqueous one-step novel coprecipitation method by the use of a new alkaline agent i.e. 2 -(Ethylamino) ethanol and systematically characterized using various analytical techniques. Fe 3 O 4 MNPs can easily be separated after completion of reaction and can be reused seven times without any considerable loss of its activity. The use of ultrasound made homogeneous dispersion of MNPs in water which accelerated the rate of reaction for the synthesis of PPCDs. This protocol has the notable advantages like short reaction time, inexpensive catalyst, eco-safe, high yield and also favours green chemistry protocol.

Manuscript number: slct.202002977
MS Type: Full Paper
Title: "Facile synthesis of novel pyrano-pyrido-carbazole scaffolds using magnetic Fe3O4 nanoparticles as a heterogeneous green and reusable catalyst"
Correspondence Author: Dr Divya Verma

Dear Rajmohan,

Thank you for evaluating the above-mentioned Full Paper for ChemistrySelect. Your time and effort are greatly appreciated.

You can access this and other referee reports you have provided by going to https://www.editorialmanager.com/chemselect/ and logging on as a Reviewer. If you have forgotten your password, please use the "Send Login Details" option given on the login screen.

Yours sincerely,

The Editorial Office

Ms. Ref. No.: MOLSTRUC-D-20-03609
Title: The Pd nanoparticles immobilized on the functionalized polymeric scaffold: A capable and green catalyst for the benzylation reaction
Journal of Molecular Structure

Dear Dr. Rangasamy Rajmohan,

You are invited to review the above-mentioned manuscript that has been submitted for publication in Journal of Molecular Structure.

The manuscript abstract is attached below. If you are willing to review this manuscript, please click on the link below:
https://ees.elsevier.com/molstruc/l.asp?i=456516&l=4QB2XHVW

If you are NOT able to review this manuscript, please click on the link below. We would appreciate receiving suggestions for alternative reviewers:
https://ees.elsevier.com/molstruc/l.asp?i=456515&l=3AOR967E

Alternatively, you may also register your response by accessing the Elsevier Editorial System for Journal of Molecular Structure as a REVIEWER using the logon credentials below:
https://ees.elsevier.com/molstruc/
Your username is: rangagncchem@gmail.com

If you need to retrieve password details, please go to:
http://ees.elsevier.com/molstruc/automail_query.asp

If you accept this invitation, I would be very grateful if you would return your review by .

You may submit your comments online at the above URL. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed.

As a reviewer you are entitled to complimentary access to Scopus and ScienceDirect for 30 days. Full instructions and details will be provided upon accepting this invitation to review.

In addition to accessing our subscriber content, you can also use our Open Access content. Read more about Open Access here: http://www.elsevier.com/openaccess

*Scopus is the world's largest abstract and citation database of research information and quality internet sources. Please also note that authors have been invited to convert their supplementary material into a Data in Brief article (a data description article). You may notice this change alongside the revised manuscript. You do not need to review this, but may need to look at the files in order to confirm that any supporting information you requested is present there.

With kind regards,

Maofa Ge, Ph D

Ms. Ref. No.: MOLSTRUC-D-20-03609
Title: The Pd nanoparticles immobilized on the functionalized polymeric scaffold: A capable and green catalyst for the benzylation reaction
Journal of Molecular Structure

Dear Dr. Rangasamy Rajmohan,

Thank you for agreeing to review manuscript number MOLSTRUC-D-20-03609 for Journal of Molecular Structure.

If possible, I would appreciate receiving your review by Sep 01, 2020.

To view the submission: https://ees.elsevier.com/molstruc/l.asp?i=456691&l=TLHEIHY2

Please note that, if present, we ask you to include Highlights and the Graphical Abstract in the reviewing process.

You may submit your comments online at the Elsevier Editorial System: https://ees.elsevier.com/molstruc/. Please login as a Reviewer using the following username and password:

Your username is: rangagncchem@gmail.com
If you need to retrieve password details, please go to:
http://ees.elsevier.com/MOLSTRUC/automail_query.asp

You may access the manuscript by selecting the "Pending Assignments" link on your Main Menu page. To submit your comments, please click on the "Submit Reviewer Recommendation" link. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed.

To assist you in the reviewing process, I am delighted to offer you full access to Scopus* for 30 days. With Scopus you can search for related articles, references and papers by the same author. You may also use Scopus for your own purposes at any time during the 30-day period. If you already use Scopus at your institute, having this 30 day full access means that you will also be able to access Scopus from home.

*Scopus is the world's largest abstract and citation database of research information and quality internet sources.

Using your EES login details, you can access Scopus from either the url below or the Scopus search bar that will appear at the top of your assignments page in EES
http://scopees.elsevier.com/ees_login.asp?journalacronym=MOLSTRUC&username=rangagncchem@gmail.com

The 30 day access period will start as soon as you activate your access to Scopus, however you have the option to save your 30 day access period, but note that it will expire six months after receiving this email.

Journal of Molecular Structure operates a manuscript transfer service to relevant title[s] in the field. This service gives authors the option, if they are unsuccessful in their original submission, to decide to have their manuscript transferred to another relevant journal without the need to resubmit or reformat.

We recognize that you are the experts in the field and we want to ensure that our editors fully utilize your comments and guidance. As such, your reviewer reports will also be internally transferred along with the manuscript to the editor

Title: The capable Pd complex immobilized on the functionalized polymeric scaffold for the green benzylation reaction
Journal of Molecular Structure

Dear Dr. Rangasamy Rajmohan,

You are invited to review the above-mentioned manuscript that has been submitted for publication in Journal of Molecular Structure.

The manuscript abstract is attached below. If you are willing to review this manuscript, please click on the link below:
https://ees.elsevier.com/molstruc/l.asp?i=474942&l=FTSPNLKA

If you are NOT able to review this manuscript, please click on the link below. We would appreciate receiving suggestions for alternative reviewers:
https://ees.elsevier.com/molstruc/l.asp?i=474941&l=FTSPNLKA

Alternatively, you may also register your response by accessing the Elsevier Editorial System for Journal of Molecular Structure as a REVIEWER using the logon credentials below:
https://ees.elsevier.com/molstruc/
Your username is: rangagncchem@gmail.com

If you need to retrieve password details, please go to:
http://ees.elsevier.com/molstruc/automail_query.asp

If you accept this invitation, I would be very grateful if you would return your review by .

You may submit your comments online at the above URL. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed.

As a reviewer you are entitled to complimentary access to Scopus and ScienceDirect for 30 days. Full instructions and details will be provided upon accepting this invitation to review.

In addition to accessing our subscriber content, you can also use our Open Access content. Read more about Open Access here: http://www.elsevier.com/openaccess

*Scopus is the world's largest abstract and citation database of research information and quality internet sources. Please also note that authors have been invited to convert their supplementary material into a Data in Brief article (a data description article). You may notice this change alongside the revised manuscript. You do not need to review this, but may need to look at the files in order to confirm that any supporting information you requested is present there.

With kind regards,
