**Report**

A seminar entitled **"Java Enterprises with Devops"** held on 24-01-2019 presented by **Ms. Pavithra,** Tech Mentor, NIIT Limited.

The emergence of the digital era has presented us with great opportunities as well as unique challenge. A digital transformation strategy aims to create the capabilities of fully leveraging the possibilities and opportunities of new technologies and their impact faster, better and in more innovative way in the future. The main target of this seminar is the students should know the various aspects of enterprise app development and on to implementation of these aspects through project-based learning methodology. Project-based learning will ensure that the student is ready to be productive in his organization – right from day one, hour one.

The seminar was well organized, and effectively delivered that helped the students to actively involve to explore and clarify issues in detail. The presenter pointed out some latest technologies like Bootstrap, Java script, J Query, Angular JS, Hibernate, Spring, GitHub's forking tool etc. She discussed on java, jsp, j2EE commands, and the students responded very well. This seminar was a great platform for the students to test their ability and explore their ideas through Query Sessions.
The feedback of the participants confirmed that the seminar was very much appreciated. The students got benefited and understood the various app development processes and also the notion of refinement of career opportunity. To go with the saying "*Knowing is not enough, we must apply.*" The students can succeed through applying what they have learned in the seminar.
