### Course Objective:

Values are socially accepted norms to evaluate objects, persons, and situations that form part and parcel of sociality. A value system is a set of consistent values and measures. Knowledge of the values are inculcated through education. It contributes in forming true human being, who are able to face life and make it meaningful. There are different kinds of values like ethical or moral values, doctrinal or ideological values, social values and aesthetic values. Values can be defined as broad preferences concerning appropriate course of action or outcomes. As such, values like, “Equal rights for all”, “Excellence deserves admiration”, “People should be treated with respect and dignity”. Values tend to influence attitudes and behavior and help to solve common human problems. Values are related to the norms of a culture.
